

### How to Use GCWRs to Determine Powertrain and Rear Axle Ratio for Trailering

Use Gross Combination Weight Ratings (GCWRs) to determine the engine, transmission, and rear axle ratio you will require to tow a trailer with your vehicle. The chart below shows you the maximum allowable GCWRs based on all the available engines and rear axle ratios with automatic or manual transmissions.

The GCWR includes the total loaded weight of both the vehicle and trailer. Any available engine may be used for trailering if the GCWR shows it is not exceeded. The trailer weight can be increased by 20% if the vehicle speed will not exceed 20 mph.
