HITCHES & EQUIPMENT

GMC TRAILERING PACKAGE

Every GMC vehicle offers a factory Trailering Package that includes a platform hitch, wiring and additional cooling as necessary to reach the maximum trailering capacity for each vehicle. Installation of an aftermarket hitch alone will only allow for a minimal trailering capacity as outlined in the vehicle's Owner's Manual.

SELECTING THE RIGHT HITCH

Choosing the right hitch and making the proper electrical connections affects how your vehicle handles, corners and brakes, and allows you to alert other drivers of your intentions. Before selecting a hitch or trailering package, you should be familiar with the weight ratings specific to your GMC vehicle.

HITCH BALL ON STEP BUMPER

SELECTING TRAILERING EQUIPMENT

Every GMC vehicle features a variety of standard and available equipment for enhanced trailering performance. Aside from the equipment described below, features such as heavy-duty cooling and extendable [ballbar devices](#) may be available. See your GMC dealer for more information on the model you're interested in.

WEIGHT CARRYING HITCH

This consists of a hitch ball mounted to a step bumper or draw bar, commonly used for trailering light and medium loads. Hitch balls are available in a range of sizes. Make sure that the diameter of your hitch ball matches your trailer coupler. Also check that the ball meets or exceeds the [GVM](#) [ballbar weight limits](#).

HITCH BALL ON A DRAW BAR

WEIGHT-DISTRIBUTING CARRYING HITCH

This is most often used for heavier trailering. This hitch type more evenly distributes the trailer load by using spring bars to shift some of the hitch weight forward onto the tow vehicle's front axle, and rearward to the trailer's axles.
