The image displays three overlapping worksheets for a reading comprehension activity. The central worksheet is titled "Force and Acceleration" and includes the following sections:

- Reading Passage:** A text explaining force and acceleration, starting with "Force and acceleration are fundamental concepts in classical mechanics. According to Newton's second law, which states that the net force acting on an object is equal to the mass of the object multiplied by its acceleration ($F = ma$), the relationship between these two variables is directly proportional to the object's mass. In addition, the direction of the force and acceleration also determines the direction of the object's motion." It further explains that for an object to accelerate, there must be a net force acting on it, and that acceleration is a vector quantity.
- Comprehension Questions:** A list of 15 numbered questions, each followed by a "True" or "False" checkbox.
 - 1. Force and acceleration are directly proportional to each other.
 - 2. According to Newton's second law, the acceleration of an object is directly proportional to the net force applied to it.
 - 3. The direction of the force and acceleration also determines the direction of the object's motion.
 - 4. An object will only accelerate if there is a net force acting on it.
 - 5. Acceleration is a vector quantity.
 - 6. The relationship between force and acceleration is directly proportional.
