

Concepts: Patterns in Triangles

Many more mathematical relationships are produced by the placement of tangents to the escribed circle with vertices of a triangle as external centers of similitude than are produced by the inscribed circle.

Students are advised that the triangles are used here as vehicles for the study of tangents. There are small triangles below each line, a primary one and a secondary one. About similar triangles, especially. However, the main purpose is to give a picture of the relationships between the tangents and the vertices of the triangle.
