Education and climate change Samantha Govender, Mncedisi C Maphalala, Dumisani W. Mncube, 2025-06-15. The book highlights the critical yet often overlooked role of education in combating climate change. It advocates for a transformative educational framework that integrates social emotional learning and interdisciplinary collaboration. Traditional education which focuses solely on factual knowledge is deemed insufficient. Instead education should foster empathy, provide hands-on experiences and encourage active engagement in climate solutions. The book outlines various ways education can drive climate action such as raising awareness, preparing individuals for green jobs, empowering communities and fostering innovation in higher education. It highlights the interconnectedness of climate change and education particularly for marginalised populations showing how quality education can enhance both mitigation and adaptation strategies while supporting Sustainable Development Goal SDG 4 and SDG 13. Key chapters discuss successful initiatives such as the Keep it Cool Climate Change Education KIC CCE project in South Africa and offer strategies for integrating climate change education into subjects like Natural Sciences and Geography. Ultimately the book positions education as a strategic tool for promoting sustainable development and building climate resilience. New research findings presented in the book connect education to climate change highlighting education as both a tool to address climate issues and a domain affected by these issues. The book integrates empirical evidence, innovative theories and practical examples to ensure intellectual integrity and academic rigour. It introduces a unique framework that emphasises social emotional learning, action-oriented teaching and interdisciplinary collaboration. Case studies such as the KIC CCE initiative in South Africa illustrate these concepts. The book critiques traditional models and advocates for transformative approaches to climate education aligning with SDG 4 Quality Education and SDG 13 Climate Action. It also highlights the significance of teacher preparedness, community empowerment, gender equality and innovation providing valuable insights for scholars, policymakers and practitioners addressing the climate crisis.

Law, Ecology, and the Management of Complex Systems Tiina Paloniitty, 2022-08-19. This book addresses the role of law in the adaptive management of socio-ecological systems. Recent years have witnessed a rise in discussion over the relation between adaptivity and law as if after decades of insouciance legal scholars have finally started to understand the impacts of the scientific paradigm called adaptive management on the legal sphere. Even though the complicated relations between law and the adaptive management of socio-

ecological systems have become more debated a thorough examination of the scientific and theoretical fundamentals of such endeavours has yet to be presented Using the illustrative example of European Union water governance and its path toward embracing adaptive management this book emphasises the legal significance of properly understanding the manner in which scientific knowledge of the environment is produced Though always pivotal rigorously apprehending science is especially crucial when dealing with the management of complex ecosystems as the normative is created gradually before law begins to examine the facts of the matter After examining the roots of adaptive management this book argues that the legal needs to understand itself as an integral part of the process of the socio ecological management of complex systems and not merely an external umpire resolving disputes As a whole the book offers new insights into the EU regulator s approaches to scientific realities making it an interesting read not only to academics and legal scholars but also to regulators striving to deepen their understanding or pondering which approach to adopt in the face of new regulatory challenges and to scientists interested in the science and law aspects of their work
