Teacher's Guide to the Modern Biology Program James Howard Otto, Albert Towle, Elizabeth H. Crider, 1965

Immortal Woman Rebecca Skloot Jr., 2026-02-18 In 1951 a poor African American tobacco farmer named Henrietta Lacks visited Johns Hopkins Hospital complaining of a knot in her womb. Doctors took a biopsy of her aggressive cervical cancer without her knowledge or consent. Henrietta died months later but her cells did something no human cells had ever done before in a lab: they didn't die. They multiplied. The Immortal Woman tells the story of the HeLa cell line, the first immortal human cells ever grown in culture. These cells became the workhorse of modern biology, essential for developing the polio vaccine, cancer treatments, and gene mapping. They have been bought and sold by the billions. Yet for decades Henrietta's family lived in poverty, unable to afford health insurance, completely unaware that a part of their mother was alive and fueling a multi-billion dollar industry. This book is a powerful exploration of medical ethics, race, and the ownership of our own bodies. It honors the woman behind the microscope slide.

Solid State Physics: Metastable, Spintronic Materials and Mechanics of Deformable Bodies Subbarayan Sivasankaran, Pramoda Kumar Nayak, Ezgi Günay, 2020-05-27 This book describes the recent evolution of solid state physics, which is primarily dedicated to examining the behavior of solids at the atomic scale. It also presents various state-of-the-art reviews and original contributions related to solid state sciences. The book consists of four sections: solid state behavior, metastable materials, spintronic materials, and mechanics of deformable bodies. The authors' contributions relating to solid state behavior deal with the performance of solid matters pertaining to quantum mechanics, physical metallurgy, and crystallography. The authors' contributions relating to metastable materials demonstrate the behavior of amorphous bulk metallic glasses and some nonequilibrium materials. The authors' contributions relating to spintronic materials explain the principles and equations underlying the physics, transport, and dynamics of spin in solid state systems. The authors' contributions relating to the mechanics of deformable bodies deal with applications of numeric and analytic solutions, models for solid state structures under deformation.

Key Features: Issues in solid state physics, Lagrangian quantum mechanics, Quantum and thermal behavior of HCP crystals, Thermoelectric properties of semiconductors, Bulk metallic glasses and metastable atomic density determination, Applications of spintronics and Heusler alloys, 2D elastostatic mathematical modeling and dynamic stiffness methods on deformable bodies.

Gender, Class, and Freedom in Modern Political Theory

Nancy J. Hirschmann,2009-04-11 In Gender Class and Freedom in Modern Political Theory Nancy Hirschmann demonstrates not merely that modern theories of freedom are susceptible to gender and class analysis but that they must be analyzed in terms of gender and class in order to be understood at all Through rigorous close readings of major and minor works of Hobbes Locke Rousseau Kant and Mill Hirschmann establishes and examines the gender and class foundations of the modern understanding of freedom Building on a social constructivist model of freedom that she developed in her award winning book *The Subject of Liberty Toward a Feminist Theory of Freedom* she makes in her new book another original and important contribution to political and feminist theory Despite the prominence of state of nature ideas in modern political theory Hirschmann argues theories of freedom actually advance a social constructivist understanding of humanity By rereading human nature in light of this insight Hirschmann uncovers theories of freedom that are both more historically accurate and more relevant to contemporary politics Pigeonholing canonical theorists as proponents of either positive or negative liberty is

historically inaccurate she demonstrates because theorists deploy both conceptions of freedom simultaneously throughout their work *Outlook and Independent* ,1911 **Outlook** Alfred Emanuel Smith, Francis Walton, 1911
