

GEOMETRY PERFORMANCE TASK

Name _____

Area, Perimeter, and Angle Measures

In Covington, USA, all the streets run perfectly north/south or east/west, except Main Street, which runs across Main Street to create a 20° angle at the NW corner (indicated on diagram).

- Water Street is exactly 800 yards north of Conclusive Ave.
 - It is exactly 1800 yards from Main Street due east to the coast.
 - If you are at the corner of Main Street and Water Street, it is only 750 yards due east to the coast.
- ➊ Label the drawing with the above measurements, including what you know about the angles.

You have been commissioned to build a park on the piece of land that is bounded by Water Street, Main Street, and Conclusive Ave. As part of your plan, you are building a semicircular dock that extends out into the water (this is already shown on the diagram).

- ➋ Shade in (lightly please) the region that is the park (including the dock).
- ➌ The Mayor would like to know how big the park will be (including the dock) so that he can write a press release. What will you tell him? Show and explain your work!

Performance Assessment Brian McLean Semple, 1992 The second International Assessment of Educational Progress focused on the mathematics and science achievement of 13 year olds Performance assessments were used as part of the overall assessment in four countries England Scotland Soviet Union and Taiwan and five Canadian provinces The performance assessment approach drew heavily on the experience of the United Kingdom in such assessments but added features to meet the needs of an international study The performance tasks required students to apply concepts observe measure manipulate equipment and materials and record and interpret data Approximately 3 000 students participated in the 1991 mathematics and science assessments Scores varied widely from task

to task and from country to country Relative performance of countries and provinces generally differed from those identified by written curriculum based tests A major lesson learned from the experimental test administration is that this form of performance assessment can be used reliably in international comparative studies although at an estimated cost three to four times greater than that for an equivalent number of written test questions Sample mathematics and science tasks are included and there is an appendix on problem solving in mathematics that describes outcomes produced by Scottish students
