How to Recover from Fibromyalgia John Bergman, 2013-05-06 The standard approach that the medical world uses for the standard diseases has not worked and will not work to cure Fibromyalgia Syndrome FMS The standard medical approach is to use medications or physical therapies to deal with the symptoms and that does nothing for the source or the cause of FMS When you look at what the medical world does to identify a disease like blood tests x rays biopsies cerebral spinal fluid analysis etc virtually every standard test the medical world does for FMS shows negative That is why for years even the existence of FMS was in question Now there are brain scans that show some positive findings for the existence of FMS These brain scans even though they show FMS exists they won't help the Fibromyalgia patient find a cure When I say cure I mean cure If you or someone you know is diagnosed and suffering from FMS there is a way to get back to the natural state of a human being which is healthy pain free full of dynamic energy sleeping great and waking refreshed This natural state of health can never be achieved by dealing with the symptoms of FMS with medications When you look at the horror that people with FMS have endured you have to feel great compassion Imagine going to doctor after doctor and negative test after negative test and taking medications and suffering the whole time and then being sent to the psychiatrist because if the tests are negative it must be a mental condition And this happens all the time Fibromyalgia patients suffer physical pain but perhaps the greatest pain is not being heard For them it is almost a relief to have the diagnosis of FMS so their suffering is recognized and validated I have had patients as young as 12 years old and up to 73 years old come to me diagnosed with FMS with the average age being between 25 and 45 Every aspect of their lives has been affected with this disease limiting even the most basic of daily activities and family interactions I have seen relationships torn apart and the black cloud of FMS descend on whole families even though just one person has FMS FMS affects spouses siblings children and friends of the person suffering with FMS Now the tough part of this is that Fibromyalgia is a disease that according to medical authorities is incurable The Mayo Clinic definition of Fibromyalgia is Fibromyalgia is a disorder characterized by widespread

musculoskeletal pain accompanied by fatigue sleep memory and mood issues Researchers believe that fibromyalgia amplifies painful sensations by affecting the way your brain processes pain signals Symptoms sometimes begin after a physical trauma surgery infection or significant psychological stress In other cases symptoms gradually accumulate over time with no single triggering event Women are much more likely to develop fibromyalgia than are men Many people who have fibromyalgia also have tension headaches temporomandibular joint TMJ disorders irritable bowel syndrome anxiety and depression While there is no cure for fibromyalgia a variety of medications can help control symptoms The highlights are mine Think of this the Mayo Clinic is held up as a great medical authority in this country And they say characterized by widespread musculoskeletal pain accompanied by fatigue sleep memory and mood issues And Symptoms sometimes begin after a physical trauma surgery infection or significant psychological stress and there is no cure for fibromyalgia a variety of medications can help control symptoms Their definition is widely embraced by most rheumatologists and most medical doctors and even alternative practitioners hold to this view Insanity is doing the same thing over and over again and expecting different results Albert Einstein
