Memorandum Tourism Phase2:

Tourism and Poverty Reduction Anna Spenceley, Dorothea Meyer, 2017-10-02 Over the past decade there have been an increasing number of publications that have analysed and critiqued the potential of tourism to be a mechanism for poverty reduction in less economically developed countries LEDCs This book showcases work by established and emerging researchers that provides new thinking and tests previously made assumptions providing an essential guide for students practitioners and academics This book advances our understanding of the changes and ways forward in the field of sustainable tourism development Five main themes are illustrated throughout the book 1 measuring impacts of tourism on poverty 2 the need to evaluate whether interventions that aim to reduce poverty are effective 3 how unbalanced power relations and weak governance can undermine efforts 4 the importance of the private sector s use of pro poor business practices and 5 the value of using multidisciplinary and multi method research approaches Furthermore the book shows that academic research findings can be used practically in destinations and how practitioners can benefit from sharing their experiences with academic scholars This book was based on a special issue and various articles from the Journal of Sustainable Tourism

Historical Archeology of Tourism in Yellowstone National Park Annalies Corbin, Matthew Russell, 2009-12-01 Far too often in the field of archeology the wheel of understanding and insight has a narrow focus that fails to recognize critical studies Crucial information regarding pivotal archeological investigations at a variety of sites worldwide is extremely difficult if not impossible to obtain The majority of archeological analysis and reporting at best has limited publication The majority of archeological reports are rarely seen and when published are often only in obscure or out of print journals the reports are almost as hard to find as the archeological sites themselves There is a desperate need to pull seminal archeological writings together into single issue or thematic volumes It is the intention of this series When the Land Meets the Sea to address this problem as it relates to archeological work that encompasses both terrestrial and underwater archeology on a single site or on a collection of related sites For example despite the fact that we know that bays and waterways structured historic settlement there is a lack of archeological literature that looks at both the nautical and terrestrial signatures of watersheds in reference to historic culture

People and Tourism in Fragile Environments Martin F. Price, 1996 Mountains deserts savannahs and the polar regions are fragile both in their ecologies and the cultures of their inhabitants These fragile environments are characterised by a marked seasonality and many human

activities are limited to clearly defined times of the year Environmental impacts arise not only from traditional economic activities but also from tourism which has recently grown rapidly in many of these environments around the world This trend is welcomed by the tourism industry but viewed with apprehension by many organisations concerned with protecting the human and natural systems of fragile environments While tourism can provide new sources of revenue and help stem depopulation it can also destabilise communities making them dependent on external sources of money and endangering long established traditions and ways of life People and Tourism in Fragile Environments discusses many of these delicate interactions by presenting detailed case studies from five continents The contributors write from a wide and well balanced range of perspectives including anthropology geography recreation national park management environmental consulting and the tourism industry The common theme is clear that tourism must always be seen in the long term context of the communities with which it interacts This book is an essential contribution to the literature of tourism and sustainable development and will be widely read by students of tourism travel and tourism professionals and anyone involved in related fields of sustainable development and fragile environments
