Best Practice Guidelines for the Re-Introduction of Great Apes Benjamin Beck, 2007 From the website Although the IUCN has previously established working protocols for plant and animal re introduction the great apes present unique challenges and concerns owing to their singular cognitive development This prompted the Primate Specialist Group to reconsider the existing guidelines in terms of the specific needs of great apes The resulting synthesis representing the expert opinion of primatologists and re introduction practitioners is presented here as part of the series of best practices documents Specifically designed for rehabilitators and specialists in re introduction these guidelines start from the fundamental assumption that re introductions should not endanger wild populations of great apes or the ecosystems they inhabit Equally important is the health and welfare of the individual great apes being re introduced as well as the caretaker staff and the residents of the surrounding areas The re introduction guidelines also require that the factors which first threatened great apes in the proposed site of release have been addressed and resolved
