

Multiple Choice Question Answers to “Physics” by Halliday, Resnick and Krane (5th Edition)

How to Contribute

Scroll down to the relevant chapter(s) you are interested in solving, and type in your answers there through the “suggestion” feature. Worried it’s wrong? Still write it down. Someone will come along and either agree or disagree. Here’s some things you can do other than solving problems:

- Checking existing problems. Do you see someone else suggesting an answer? Do the problem and comment whether you agree or disagree.
- Can’t figure out a problem? Comment, and someone will help. Remember, this is intended for us to learn from one another.
- Have any other questions or doubts? Comment again!

We will do our best to resolve all suggestions as soon as possible. This answer key was made possible by the numerous contributions in the [Physics Olympiad Discords](#) (please join us if you want to participate and discuss with other enthusiasts about physics).

Formatting

In general, do not worry about the formatting. Each chapter has up to 20 problems so you may see more problems numbered than there actually is. Don’t worry about that. Here’s some things to keep in mind:

- Try to capitalize your letter answer. This is simply for the sake of consistency.
- If a question has multiple parts (say 3a,3b,3c) then separate the answer for each part with dashes.
 - Eg. “3. C / ? / B” would be a possible cell if you knew the answers to 3a and 3c, but not for 3b.
- If a question asks you to select all that apply, separate the answers with an “&” symbol comma.
 - Eg. “7. A, C” would be a possible cell if both A and C were correct answers.

Credit

We are planning on publishing this *answer key* after it is complete. The *marathon* you are participating in will kickstart the project (which hopefully shouldn’t take too long). Everyone who wishes to receive credit will receive credit. To do so, you must login with your personal email (not anonymous) to make
