**Kafka's Novels** Patrick Bridgwater, 2021-11-22 Kafka's three novels to be understood as an ever more intricate portrayal of the inner life of one central character Henry James's centre of consciousness each reflecting the problems of their self-critical creator are tantamount to dreams The hieroglyphic pictorial language in which they are written is the symbolic language in which dreams and thoughts on the edge of sleep are visualized Not for nothing did Kafka define his writing as a matter of fantasizing with whole orchestras of free associations Written in a deliberately enhanced hypnagogic state these novels embody the alternative logic of dreams with the emphasis on chains of association and verbal bridges between words and word complexes The product of many years preoccupation with its subject Patrick Bridgwater's new book is an original chapter by chapter study of three extraordinarily detailed novels of each of which it offers a radically new reading that makes more and different sense than any previous reading In Barthes terms these fascinating novels are unreadable but the present book shows that properly read they are entirely if ambiguously readable Rooted in Kafka's use of language it consistently explores in detail i the linguistic implications of the dreamlike nature of his work ii the metaphors he takes literally and iii the ambiguities of so many of the words he chooses to use In doing so it takes account not only of the secondary meanings of German words and the sometimes dated metaphors of which Kafka taking them literally spins his text but also where relevant of Czech and Italian etymology Split for ease of reference into chapters corresponding to the chapters of the novels in the new Originalfassung the book is aimed at all readers of Kafka with a knowledge of German for the author shows that Kafka's texts can be understood only in the language in which they were written because Kafka's meaning is often hidden beneath the surface of the text conveyed via secondary meanings that are specific to German any translation is necessarily an Oberflächensetzung

**Creating Wicked Students** Paul Hanstedt, 2023-07-03 In *Creating Wicked Students* Paul Hanstedt argues that courses can and should be designed to present students with what are known as wicked problems because the skills of dealing with such knotty problems are what will best prepare them for life after college As the author puts it this book begins with the assumption that what we all want for our students is that they be capable of changing the world When a student leaves college we want them to enter the world not as drones participating mindlessly in activities to which they've been appointed but as thinking deliberative beings who add something to society There's a lot of talk in education these days about wicked problems problems that defy traditional expectations or knowledge problems that evolve over time Zika ISIS political discourse in the era of social media To prepare students for such wicked problems they need to have wicked competencies the ability to respond easily and on the fly to complex challenges Unfortunately a traditional education that focuses on content and skills often fails to achieve this sense of wickedness Students memorize for the test prepare for the paper practice the various algorithms over and over again but when the parameters or dynamics of the test or the paper or the equation change students are often at a loss for how to adjust This is a course design book centered on the idea that the goal in the college classroom in all classrooms all the time is to develop students who are not just loaded with content but capable of using that content in thoughtful deliberate ways to make the world a better place Achieving this goal requires a top to bottom reconsideration of courses including student learning goals text selection and course structure day to day pedagogies and assignment and project design *Creating Wicked Students* takes readers through each step of the process providing multiple examples at each stage while always encouraging instructors to consider concepts and exercises in light of their own courses and students
