Morin, M.A. Larkin, 2018-10-11 They found a planet where none belonged They should have left it alone It is a planet like nothing the galaxy has seen Found deep in the astral Inhabited by creatures out of myth and legend Formerly inhabited by a race far more advanced than anyone could have imagined And now it s been discovered a bunch of reckless opportunists and enthusiastic amateurs No one is prepared for what comes next Mission 1 Shadow Planet Her family s company went bankrupt With nothing but a failing mining station as severance pay Director Fujita Hiroko moves to the edge of the galaxy to keep the station afloat When the nearby planet vanishes with her and her survey team still on the surface hopes of mining are quickly replaced by a more pressing goal finding a way back to her station Mission 2 Wizard Zero When a survey team unearths buildings on prospective mining planet at first it s hailed as an archeological jackpot But the ancient structures are more advanced than anyone s seen And the hedge against technology is a wizard Mission 3 Shielded Sun With rival factions in orbit around Shadow Planet the obvious threat was one another When the defenses of an ancient alien outpost activate trapping everyone in the star system it becomes clear that there was more to worry about beneath the planet s surface than in orbit around it Mission 4 Prime Guardian The ancient solution to get magic and tech to coexist lies within an alien structure older than any race in the galaxy Now the balance of power threatens to tip As factions reinforce their fleets for a war to claim the ultimate technological prize Hiroko finds herself trapped between three races one of them her own in a quest where even victory promises disaster Bonus Short Story Tour of Darkness The galaxy s oldest historical site has become a tourist attraction It also holds untold secrets that could shift the course of civilization How far will one lone wizard go to protect the ancient technology that lies within Black Ocean Astral Prime hearkens back to location based space sci fi classics like Babylon 5 and Star Trek Deep Space Nine Astral Prime builds on the rich Black Ocean universe introducing a colorful cast of characters for new and returning readers alike Come along for the ride as a minor outpost in the middle of nowhere becomes a key point of interstellar conflict **The True Story of Human Evolutionary Genesis** Elvis Newman, 2015-01-20 No doubt history is littered with theories and beliefs that not only proved to be wrong in the end but also costly as far as the human search for truth and development is concerned The view that the Earth was the physical and the biological center of the Universe was one such failed theory one that cost many famous scientists most of their lives and held back societies everywhere for decades or hundreds of years behind what is now considered a given truth In the current work under consideration religion and evolution theories come under scrutiny in light of recent scientific facts that dispute their most important claims about the origins of the species In **The True Story of Human Evolutionary Genesis** Elvis Newman presents both astounding facts and findings about the human genome as well as paradigm shifting theories emanating from Zecharia Sitchin s work around the Sumerian clay tablets *The Gene-splicing Wars* Raymond A.
