Farrell Taylor Lab Manual For Biochemistry:

Experiments in Biochemistry Shawn O. Farrell, Ryan T. Ranallo, 2000 The experiments have been classroom tested through multiple semesters They are proven to work and can be completed in a normal lab period Alternate versions of experiments allow for easy use in labs which meet once a week or multiple times a week The manual also makes it easy for students to use due to six Tip boxes located throughout the text which give pointers on how to perform the labs and six Essential Information boxes that highlight pertinent information There are also references and further reading sections located at the end of each chapter

Biotherapeutics Lyn H Jones, Andrew J McKnight, 2013-09-06 This book illustrates the successful partnership of chemistry and biology to advance successful biotherapeutic modalities Molecular design to create function is common to both chemical and molecular biology and this text highlights recent developments from these disciplines that have delivered drugs clinical candidates or significantly advanced biotherapeutic approaches Biotherapeutics are often considered to be beyond the reach of the medicinal chemist but this book demonstrates that chemistry has an essential role in the future success of this area by explaining and describing the chemical biology technologies that underpin specific

therapeutic advances and demonstrating the unique value of molecular design and understanding Covering topics such as selective protein modification immunopharmacotherapy chemically programmed vaccinations nanobodies and antibodies this book provides essential reading for medicinal and pharmaceutical chemists working in both industry and academia
