Primary Mathematics: Teaching For Understanding Barmby, Patrick, Bilborough, Lynn, Harries, Tony, 2009-09-01 This book addresses the particular areas of mathematics within the primary curriculum that teachers find difficult to teach and in which children struggle to achieve. It begins with introductory sections on how children learn mathematics and is then organised on a subject area basis dealing with the teaching of particular maths topics. Key topics addressed include rounding and measuring means and medians, fractions, negative numbers, commutative and associative laws in number operations and shape and space. Within each chapter the authors examine the themes of representing reasoning and communicating, drawing out both the subject knowledge and ways of teaching each topic. A reference section for studies drawn upon is provided at the end of each chapter.

Framework Maths David Capewell, 2002 The Framework Maths course is designed to match the pitch, pace and progression of the Framework for Teaching Mathematics at Key Stage 3. This student's book is written for the Extension tier in Year 7 and is suitable for students working beyond the Framework objectives. It comprises units organized clearly into full colour spreads. Each unit offers prior learning points identified at the start so that revision is a continual process. Learning objectives are covered with examples showing the key techniques, plenty of practice with questions pitched at the level suggested in the framework and summaries and review questions to help students gain responsibility for their learning.

K. Ueng,Institute for Computer Applications in Science and Engineering,1995 Abstract The plotting of streamlines is an effective way of visualizing fluid motion in steady flows Additional information about the flowfield such as local rotation and expansion can be shown by drawing in the form of a ribbon or tube In this paper we present efficient algorithms for the construction of streamlines streamribbons and streamtubes on unstructured grids A specialized version of the Runge Kutta method has been developed to speed up the integration of particle paths We have also derived closed form solutions for calculating angular rotation rate and radius to construct streamribbons and streamtubes respectively According to our analysis and test results these formulations are two to four times better in performance than previous numerical methods As a large number of traces are calculated the improved performance could be significant Multiscale Computational Methods in Chemistry and Physics Achi Brandt,Jerzy Bernholc,Kurt Binder,2001 This book brings together interdisciplinary contributions ranging from applied mathematics theoretical physics quantum chemistry and molecular biology all addressing various facets of the problem to connect the many different scales that one has to deal with in the computer simulation of many systems of interest in chemistry e g polymeric materials biological molecules clusters surface and interface structure Particular emphasis is on the multigrid technique and its applications ranging from electronic structure calculations to the statistical mechanics of polymers **Russian Journal of Numerical Analysis and Mathematical Modelling** ,2003 **International Aerospace Abstracts** ,1996 **Conference Proceedings** ,1998 **Conference Proceedings of the 1998 International Conference on Supercomputing** ,1998 Proceedings Parallel Computing **Proceedings of the Fourth Copper Mountain Conference on Multigrid Methods** Jan Mandel,1989 **Recent Progress in Many-body Theories** ,2001 Journal of the Royal Aeronautical Society ,2002
