

Gasland

Discussion Guide

Release Year: 2013

Run Time: 90 min

MPAA Rating: PG-13

Viewing this movie with students may bring the following issues:

Key Summary

Gasland is a documentary film that explores the complex and often hidden world of natural gas. The film follows a man, Mark Curran, as he travels across the United States, uncovering the secrets of the gas industry. Curran discovers that many of the gas wells in the United States are actually "water wells" that have been drilled into the ground, and that the gas is being produced from the water. This discovery leads Curran to investigate the gas industry's practices, including the use of hydraulic fracturing (fracking) to extract gas from shale rock. The film also explores the environmental and health impacts of fracking, and the role of the gas industry in the economy.

This documentary raises important questions about the role of the gas industry in the United States, and the impact of fracking on the environment and public health. It also explores the complex and often hidden world of natural gas, and the role of the gas industry in the economy. The film is a powerful and thought-provoking work that challenges viewers to think critically about the gas industry and its practices.
