

DOSAGE CALCULATION

METHODS FOR DRUG DOSAGE CALCULATIONS

Various methods are used for solving medication calculation, the most common methods are :

- **Desired Over Have or Formula Method**
- **Dimensional Analysis Method**
- **Ratio and Proportion Method**

Formula Method

$$\frac{\text{DESIRED (D)}}{\text{HAVE (H)}} \times \text{QUANTITY (Q)} = Y \text{ (amount to administer)}$$

Symbol	Meaning	Example
D	Dosage ordered or desired dose	<ul style="list-style-type: none"> • Give 1.2 milliliters • The doctor orders 90 milligrams
H	Dose on hand or dose, on the label of bottle, vial, ampule.	<ul style="list-style-type: none"> • 250 milligrams • 100 mg 
Q	The unit of measure for the specific dosage strength or supply on hand (the form in which the drug comes)	<ul style="list-style-type: none"> • per tablet • per capsule • in 2 mL
Y	The dosage you are trying to calculate	

Example 1: Ampicillin 1.5 g. is ordered. Ampicillin is available as 500 mg per capsules. How many tablets would the nurse administer?

- Desired (D) = 1.5 g = 1500 mg
- On hand (H) = 500 mg
- Quantity (Q) = 1 capsule

$$\frac{1500 \text{ mg}}{500 \text{ mg}} \times 1 \text{ (Capsule)} = 3 \text{ capsules}$$

Make sure that these units match up 

The nurse would administer 3 capsules

Example 2:

- Order: Acetaminophen 500 mg
- On hand: Acetaminophen 250 mg in 5 mL

- Desired (D) = 500 mg
- On hand (H) = 250 mg
- Quantity (Q) = 5 mL

$$\frac{500 \text{ mg}}{250 \text{ mg}} \times 5 \text{ mL} = 10 \text{ mL}$$

Make sure that these units match up 

The nurse would administer 10 mL of Acetaminophen

[Treatment Planning of High Dose-Rate Brachytherapy - Mathematical Modelling and Optimization](#) Björn Morén, 2021-01-12 Cancer is a widespread class of diseases that each year affects millions of people It is mostly treated with chemotherapy surgery radiation therapy or combinations thereof High dose rate HDR brachytherapy BT is one modality of radiation therapy which is used to treat for example prostate

cancer and gynecologic cancer In BT catheters i e hollow needles or applicators are used to place a single small but highly radioactive source of ionizing radiation close to or within a tumour at dwell positions An emerging technique for HDR BT treatment is intensity modulated brachytherapy IMBT in which static or dynamic shields are used to further shape the dose distribution by hindering the radiation in certain directions The topic of this thesis is the application of mathematical optimization to model and solve the treatment planning problem The treatment planning includes decisions on catheter placement that is how many catheters to use and where to place them as well as decisions for dwell times Our focus is on the latter decisions The primary treatment goals are to give the tumour a sufficiently high radiation dose while limiting the dose to the surrounding healthy organs to avoid severe side effects Because these aims are typically in conflict optimization models of the treatment planning problem are inherently multiobjective Compared to manual treatment planning there are several advantages of using mathematical optimization for treatment planning First the optimization of treatment plans requires less time compared to the time consuming manual planning Secondly treatment plan quality can be improved by using optimization models and algorithms Finally with the use of sophisticated optimization models and algorithms the requirements of experience and skill level for the planners are lower The use of optimization for treatment planning of IMBT is especially important because the degrees of freedom are too many for manual planning The contributions of this thesis include the study of properties of treatment planning models suggestions for extensions and improvements of proposed models and the development of new optimization models that take clinically relevant but uncustomary aspects into account in the treatment planning A common theme is the modelling of constraints on dosimetric indices each of which is a restriction on the portion of a volume that receives at least a specified dose or on the lowest dose that is received by a portion of a volume Modelling dosimetric indices explicitly yields mixed integer programs which are computationally demanding to solve We have therefore investigated approximations of dosimetric indices for example using smooth non linear functions or convex functions Contributions of this thesis are also a literature review of proposed treatment planning models for HDR BT including mathematical analyses and comparisons of models and a study of treatment planning for IMBT which shows how robust optimization can be used to mitigate the risks from rotational errors in the shield placement Cancer r en grupp av sjukdomar som varje r drabbar miljontals m nniskor De vanligaste behandlingsformerna r cellgifter kirurgi str lbehandling eller en kombination av dessa I denna avhandling studeras h gdosrat brachyterapi HDR BT vilket r en form av str lbehandling som till exempel anv nds vid behandling av prostatacancer och gynekologisk cancer Vid brachyterapibehandling anv nds ih liganlar eller applikatorer f r att placera en millimeterstor str lk lla antingen inuti eller intill en tum r I varje n l finns det ett antal s kallade drjpositioner d r str lk lla kan stanna en viss tid f r att bestr la den omkringliggande v vna den i alla riktningar Genom att v lja l mpliga tider f r drjpositionerna kan dosf rdelningen formas efter patientens anatomi Ut ver HDR BT studeras ocks den nya tekniken intensitetsmodulerad brachyterapi IMBT vilket r en variation p HDR BT d r sk rmming anv

FAQs About Math Dosage Review Books

What is a Math Dosage Review PDF? A PDF (Portable Document Format) is a file format developed by Adobe that preserves the layout and formatting of a document, regardless of the software, hardware, or operating system used to view or print it. **How do I create a Math Dosage Review PDF?** There are several ways to create a PDF: Use software like Adobe Acrobat, Microsoft Word, or Google Docs, which often have built-in PDF creation tools. Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF. **How do I edit a Math Dosage Review PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities. **How do I convert a Math Dosage Review PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobats export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats. **How do I password-protect a Math Dosage Review PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various

online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
