# Surge Protector Instructions
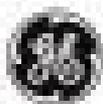

NOTE: The surge protector mounts plugged into the top outlet of the wall receptacle to ensure the screw mounting screw of the surge protector is installed properly.

## Permanent Installation

1. Disconnect power to the receptacle at the service panel.
2. Remove the center screw from the existing wallplate. The wall plate will be secured by the mounting screw included with the surge protector.
3. Remove the mounting screw hole cover on the surge protector with a small flat blade screwdriver.
4. Plug surge protector into the top receptacle of the wall outlet, over the wallplate, to ensure coverings of the unused receptacle and secure with the center mounting screw provided. Replace the screw hole cover.
5. Restore power at the service panel.
6. Make sure electronic equipment is turned off before plugging into the surge protector outlet. Do not use extension cords to connect equipment to the surge protector.
7. Connected equipment can now be turned on.

NOTE: In the event that the protection capacity is exceeded by a power surge or the protection components expire, the power will be permanently shut down to the outlets, ensuring surge protection for your electronic equipment. At this time the surge protector has reached the end of life and requires replacement.

A glowing blue "Grounded" indicator light shows that your surge protector is plugged into a grounded receptacle and that your surge protector's ground protection components are providing protection from ground surges. If the "Grounded" indicator light stops glowing, it is possible that the surge protector's ground protection components have expired or that the wall receptacle is no longer grounded.
