Jill P. Mesirov,Klaus Schulten,De Witt Sumners,2012-12-06 This IMA Volume in Mathematics and its Applications
MATHEMATICAL APPROACHES TO BIOMOLECULAR STRUCTURE AND DYNAMICS is one of the two volumes based on the
proceedings of the 1994 IMA Summer Program on Molecular Biology and comprises Weeks 3 and 4 of the four week
program Weeks 1 and 2 appeared as Volume 81 Genetic Mapping and DNA Sequencing We thank Jill P Mesirov Klaus
Schulten and De Witt Sumners for organizing Weeks 3 and 4 of the workshop and for editing the proceedings We also take
this opportunity to thank the National Institutes of Health NIH National Center for Human Genome Research the National
Science Foundation NSF Biological Instrumentation and Resources and the Department of Energy DOE whose financial
support made the summer program possible
A vner Friedman Robert Gulliver v PREFACE The revolutionary progress in
molecular biology within the last 30 years opens the way to full understanding of the molecular structures and mechanisms
of living organisms Interdisciplinary research in mathematics and molecular biology is driven by ever growing experimental
theoretical and computational power The mathematical sciences accompany and support much of the progress achieved by
experiment and computation as well as provide insight into geometric and topological properties of biomolecular structure
and processes This volume consists of a representative sample of the papers presented during the last two weeks of the
month long Institute for Mathematics and Its Applications Summer 1994 Program in Molecular Biology **Hearst's**

Mathematics Elaine McKinnon Riehm,Frances Hoffman,2011-11-03 Despite the renown of the Fields Medals J C Fields has
been until now a rather obscure figure and recovering details about his professional activities and personal life was not at all
a simple task This work is a triumph of persistence with far flung archival and documentary sources and provides a rich non
mathematical portrait of the man in all aspects of his life and career Highly readable and replete with period detail the book
sheds useful light on the mathematical and scientific world of Fields time and is sure to remain the definitive biographical
study Tom Archibald Simon Fraser University Burnaby BC Canada Drawing on a wide array of archival sources Riehm and
Hoffman provide a vivid account of Fields life and his part in the founding of the highest award in mathematics Filled with
intriguing detail from a childhood on the shores of Lake Ontario through the mathematics seminars of late 19th century
Berlin to the post WW1 years of the fragmented international mathematical community it is a richly textured story

engagingly and sympathetically told Read this book and you will understand why Fields never wanted the medal to bear his name and yet why quite rightly it does June Barrow Green Open University Milton Keynes United Kingdom One of the little known effects of World War I was the collapse of international scientific cooperation In mathematics the discord continued after the war s end and after the Treaty of Versailles had been signed in 1919 Many distinguished scientists were involved in the war and its aftermath and from their letters and papers now almost a hundred years old we learn of their anguished wartime views and their struggles afterwards either to prolong the schism in mathematics or to end it J C Fields the foremost Canadian mathematician of his time was educated in Canada the United States and Germany and championed an international spirit of cooperation to further the frontiers of mathematics It was during the awkward post war period that J C Fields established the Fields Medal an international prize for outstanding research which soon became the highest award in mathematics J C Fields intended it to be an international medal and a glance at the varying backgrounds of the fifty two Fields medallists shows it to be so Who was Fields What carried him from Hamilton Canada West where he was born in 1863 into the middle of this turbulent era of international scientific politics A modest mathematician he was an unassuming man This biography outlines Fields life and times and the difficult circumstances in which he created the Fields Medal It is the first such published study

A History of Mathematics in the United States and Canada David E. Zitarelli,Della Dumbaugh,Stephen F. Kennedy,2022-07-28 This is the first truly comprehensive and thorough history of the development of a mathematical community in the United States and Canada This second volume starts at the turn of the twentieth century with a mathematical community that is firmly established and traces its growth over the next forty years at the end of which the American mathematical community is pre eminent in the world In the preface to the first volume of this work Zitarelli reveals his animating philosophy I find that the human factor lends life and vitality to any subject History of mathematics in the Zitarelli conception is not just a collection of abstract ideas and their development It is a community of people and practices joining together to understand perpetuate and advance those ideas and each other Telling the story of mathematics means telling the stories of these people their accomplishments and triumphs the institutions and structures they built their interpersonal and scientific interactions and their failures and shortcomings One of the most hopeful developments of the period 1900 1941 in American mathematics was the opening of the community to previously excluded populations Increasing numbers of women were welcomed into mathematics many of whom including Anna Pell Wheeler Olive Hazlett and Mayme Logsdon are profiled in these pages Black mathematicians were often systemically excluded during this period but in spite of the obstacles Elbert Frank Cox Dudley Woodard David Blackwell and others built careers of significant accomplishment that are described here The effect on the substantial community of European immigrants is detailed through the stories of dozens of individuals In clear and compelling prose Zitarelli Dumbaugh and Kennedy spin a tale accessible to experts general readers and anyone interested in the history of science in North America
