Pharmaceutics is a broad field which is connected to and focused on discovering formulating optimizing and manufacturing  
various dosage forms along with their standardization One of the most important distinctions between Industrial Pharmacy  
and other branches of Pharmaceutics is the strict requirements of pharmaceutical industry for good manufacturing practice  
GMP To excel as a pharmaceutical formulator you must be able to handle the increasingly complex risk based GMP demands  
from early conceptual design qualification and validation to practical developmental implementation and execution of a  
pharmaceutical quality system Keeping the requirements of B Pharm 1st semester pharmacy students in view an effort has  
been taken to present 32 experiments in this book as per the requirement mentioned by PCI syllabus All the experiments are  
presented with theory principle procedure use and storage along with tabulations I hope the students will like to utilize this  
book while performing the experiments for Industrial Pharmacy and will definitely get acquainted with the concepts with  
greater precision The concerned faculties will definitely appreciate this book as a handbook to train their students For the

improvement of the quality of the Pharmaceutics I Laboratory Manual suggestions and criticisms from all corners of profession are greatly welcome I would be grateful to the readers if they draw my attention to the deficiencies and errors that might have remained
