Evidence of Evolution

BACKGROUND

Much evidence has been found to indicate that living things have evolved or changed gradually during their natural history. The study of fossils as well as work in embryology, biochemistry, and comparative anatomy provide evidence for evolution.

OBJECTIVE

In this lab you will learn about homologous, analogous and vestigial structures and their significance in evolution theory.

MATERIALS

colored pencils

PROCEDURES AND OBSERVATIONS**Part I. Homologous Structures.**

2. Carefully examine the drawings of the bones shown in Figure 1. Note similar positions of like bones.

1. Color each bone of the human arm a different color. (All bones of the wrist should be a

single color, the bone groups of the hand should be a different single color.) Then color the similar bone in each of the other animals the same color as the human bone.

Lab Evidence Of Evolution Answer:

Darwin, God and the Meaning of Life Steve Stewart-Williams,2010-09-30 If you accept evolutionary theory can you also believe in God Are human beings superior to other animals or is this just a human prejudice Does Darwin have implications for heated issues like euthanasia and animal rights Does evolution tell us the purpose of life or does it imply that life has no ultimate purpose Does evolution tell us what is morally right and wrong or does it imply that ultimately nothing is right or wrong In this fascinating and intriguing book Steve Stewart Williams addresses these and other fundamental philosophical questions raised by evolutionary theory and the exciting new field of evolutionary psychology Drawing on biology psychology and philosophy he argues that Darwinian science supports a view of a godless universe devoid of ultimate purpose or moral structure but that we can still live a good life and a happy life within the confines of this view [Chapter Resource 13](#)

Theory/Evolution Biology Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2004 **Creation or Evolution?**

Michael Ebifegha,2011-03-31 Were humans created or did they evolve This debate continues to rage between science and religion In Creation or Evolution author Michael Ebifegah examines these two worldviews within the framework of science He examines the constraints of science as an explanatory framework for the origin of species and compares the contemporary world to a hypothetical world under the influence of evolutionary processes and agency Additionally he considers the irrelevance of the earths age to the creationist evolutionist controversy He stresses that knowledge of the intersection between the origin of life and the origin of species is required to establish the latter Ebifegah augments the natural selection discussion in light of Fodor and Piattelli Palmarinis work and addresses sciences limitations in deploying similarity dissimilarity arguments in the debate about creationism versus evolutionism Finally he focuses on the lack of historical evidence to justify an evolutionary worldview Creation or Evolution discusses how the M theory and Charles Darwins paradigm of evolution by natural selection are outside the limits of science Ebifegah shows that we must look beyond the inadequacy of such theories and address the validity of science as the sole avenue of inquiry **Tietz Textbook**

Evolution Donald R. Prothero, 2007-11-06 Over the past twenty years paleontologists have made tremendous fossil discoveries including fossils that mark the growth of whales manatees and seals from land mammals and the origins of elephants horses and rhinos Today there exists an amazing diversity of fossil humans suggesting we walked upright long before we acquired large brains and new evidence from molecules that enable scientists to decipher the tree of life as never before The fossil record is now one of the strongest lines of evidence for evolution In this engaging and richly illustrated book Donald R Prothero weaves an entertaining though intellectually rigorous history out of the transitional forms and series that dot the fossil record Beginning with a brief discussion of the nature of science and the monkey business of creationism Prothero tackles subjects ranging from flood geology and rock dating to neo Darwinism and macroevolution He covers the ingredients of the primordial soup the effects of communal living invertebrate transitions the development of the backbone the reign of the dinosaurs the mammalian explosion and the leap from chimpanzee to human Prothero pays particular attention to the recent discovery of missing links that complete the fossil timeline and details the debate between biologists over the mechanisms driving the evolutionary process Evolution is an absorbing combination of firsthand observation scientific discovery and trenchant analysis With the teaching of evolution still an issue there couldn't be a better moment for a book clarifying the nature and value of fossil evidence Widely recognized as a leading expert in his field Prothero demonstrates that the transformation of life on this planet is far more awe inspiring than the narrow view of extremists
