## Motor Trade Theory Exam 2014:

*Automotive Technician Training: Theory* Tom Denton, Hayley Pells, 2021-09-21 Automotive Technician Training is the definitive student textbook for automotive engineering. It covers all the theory and technology sections that students need to learn in order to pass levels 1, 2, and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is ideal for courses and exams run by other awarding bodies. This revised edition overhauls the coverage of general skills and advanced diagnostic techniques and includes a new chapter about electric and hybrid vehicles and advanced driver assistance systems. Information and activities are set out in sequence to meet teacher and learner needs as well as qualification requirements. The book has been written to be used on its own or as part of a blended learning approach. It also includes links to interactive activities, assessments, and video footage on the IMI eLearning platform for which a separate subscription is required.

*Advances in Automotive Production Technology - Theory and Application* Philipp Weißgraeber, Frieder Heieck, Clemens Ackermann, 2021-06-01 This volume of the series ARENA2036 compiles the outcomes of the first Stuttgart Conference on Automotive Production SCAP2020. It contains peer-reviewed contributions from a theoretical as well as practical vantage point and is topically structured according to the following four sections: I Novel Approaches for Efficient Production and Assembly Planning; II Smart Production Systems and Data Services; III Advances in Manufacturing Processes and Materials; and IV New Concepts for Autonomous Collaborative Intralogistics. Given the restrictive circumstances of 2020, the conference was held as a fully digital event divided into two parts. It opened with a pre-week allowing everyone to peruse the scientific contributions at their own pace, followed by a two-day live event that enabled experts from the sciences and the industry to engage in various discussions. The conference has proven itself as an insightful forum that allowed for an expertly exchange regarding the pivotal Advances in Automotive Production and Technology.
