According to the GIAC, this GISF track can bridge the gap that exists between managers and system administrators. GISF candidates are expected to demonstrate key concepts of information security which include understanding the threats and risks to information and information resources, identifying best practices that can be used to protect them, and learning to diversify our protection strategy. Officially, the exam covers Attacks and Countermeasures, Building Security Policies, Cryptosystems, cryptography, and algorithms, Defense in Depth, Designing and Implementing Networks, Fundamental Security Concepts, Networking and Routing Concepts, Risk Vulnerability Assessment, Management Security as a Process, Wireless Technologies. When we develop our material, we do not classify topics the official way. In fact, we follow our own flow of instructions which we think is more logical for the overall learning process. Don't worry, it does not hurt to do so as long as you truly comprehend the material. To succeed in the exam, you need to read as many reference books as possible. There is no single book that can cover everything. This ExamFOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.
