Javascript C

- Javascript is a high-level, dynamic, interpreted language widely used to create interactive content. It spans HTML and CSS, it is one of the most widely used.
- Brendan Eich created Javascript in 1995 at Netscape Communications. It was originally named "LiveScript" and finally "Javascript".

Key Features

Client-side language: Primarily used to create interactive web pages and provide dynamic functionality.

Event-driven: Javascript can respond to user actions, such as mouse clicks, keyboard input, and other events.

Prototype-based: Javascript uses prototype-based objects to inherit properties and methods, providing a flexible and dynamic approach to class-like structures.

Weakly typed: Functions are treated as objects and can be assigned to variables, passed as arguments, and called dynamically.

Asynchronous programming: Javascript can execute multiple tasks simultaneously, allowing for non-blocking operations and efficient handling of long-running tasks without blocking the main execution thread.

A decorative graphic featuring a central yellow square with the letters "JS" in black. To the left and right of the square are yellow chevron arrows pointing outwards. The background is dark with faint, glowing lines and dots, suggesting a technical or digital theme.

Loops

Loop	Description
<code>for (let i = 0; i < 10; i++) { console.log(i); }</code>	Basic for loop
<code>while (i < 10) { console.log(i); }</code>	Basic while loop
<code>do { console.log(i); } while (i < 10);</code>	Basic do-while loop
<code>for (let i = 0; i < 10; i += 2) { console.log(i); }</code>	for loop with step
<code>for (let i = 10; i > 0; i--) { console.log(i); }</code>	for loop with reverse
<code>for (let i = 0; i < 10; i++) { console.log(i); }</code>	for loop with step and reverse

JavaScript Students Guide:

JavaScript Made Easy Anshuman Mishra, 2025-01-09 JavaScript Made Easy A Step by Step Guide for College Students is designed specifically for college students who are new to programming or looking to enhance their JavaScript skills The book takes a hands on step by step approach to learning JavaScript breaking down complex concepts into simple digestible sections Each chapter builds on the previous one ensuring that readers not only understand the syntax and logic of JavaScript but also develop a strong foundation in programming principles The book covers everything from basic syntax to advanced concepts like asynchronous programming DOM manipulation and using JavaScript in real world web development By the end of this book readers will be equipped to build interactive dynamic websites and web applications with confidence

Key Features Clear Step by Step Instructions Every concept is introduced in small manageable chunks making it easy to follow along and build on prior knowledge Hands On Projects Practical examples and exercises at the end of each chapter will help solidify the learner s understanding Real World Applications Focus on how JavaScript is used in real world web development scenarios including working with APIs and frameworks Student Friendly Written specifically with the needs and learning pace of college students in mind it includes easy to understand explanations tips and troubleshooting guides How to Study This Book Start at the Beginning Don t rush through the chapters Start with the basics even if you have some prior knowledge JavaScript can be tricky and having a solid foundation is essential for understanding more complex concepts Work through the introductory chapters and make sure you understand each concept before moving on Follow the Examples This book contains numerous examples that illustrate JavaScript in action As you read each section try running the code examples in your browser or in an online JavaScript editor Experiment by changing parts of the code and observing the results This hands on approach will help reinforce your understanding of the concepts Complete the Exercises At the end of each chapter there are exercises designed to help you apply what you ve learned Make sure to complete these exercises They will help you practice and reinforce the concepts discussed in the chapter If you find an exercise difficult don t skip it Go back to the relevant section review the content and try again Take It Step by Step Each chapter builds upon the last so don t jump ahead If you re struggling with a particular concept take the time to review it until you fully understand it It s okay to take breaks and revisit previous chapters to refresh your knowledge Work on the Final Project The final project is a great way to bring everything you ve learned together It will challenge you to think critically about how to apply JavaScript in a practical scenario Start planning your project early and break it down into smaller tasks as you learn new concepts This will give you a real sense of achievement when you complete it Ask for Help If you get stuck don t hesitate to ask for help Discuss concepts with classmates or seek assistance online in forums or communities dedicated to JavaScript Understanding programming can be difficult at first but persistent practice and collaboration will help you grow as a programmer

Step-By-Step Guide for Absolute Beginners Brian Jenkins,2019-02-28 If you want to pursue a career in development with JavaScript then this book is the best one for you In this guide the author will introduce you to some of the best resources to learn JavaScript from scratch Get your copy now JavaScript is an object oriented computer programming language commonly used to create interactive effects within web browsers This book is perfect for absolute beginners who want to learn the programming language of the web It will help you to learn the basic parts of JavaScript You will learn the essential things of programming like programming building blocks operators types variables conditionals loops functions The book has been grouped into chapters with each chapter exploring a different feature of the JavaScript scripting language The author has provided JavaScript codes each code performing a different task Corresponding explanations have also been provided alongside each piece of code to help the reader understand the meaning of the various lines of the code In addition to this screenshots showing the output that each code should return have been given The author has used a simple language to make it easy even for absolute beginners to understand Book Objectives The following are the objectives of this book To help you know how to get started with JavaScript programming To help you understand the syntax and constructs that make up the JavaScript scripting language To help you transition from a JavaScript Beginner to a Professional To help you understand how to use JavaScript to improve the interactivity of your website applications Who this Book is for The author targets the following groups of people Anybody who is a complete beginner to JavaScript programming or computer programming in general Anybody in need of advancing their JavaScript programming skills Professors lecturers or tutors who are looking to find better ways to explain JavaScript to their students in the simplest and easiest way Students and academicians especially those focusing on computer programming and web development What do you need for this Book Make sure that you have the following A text editor such as notepad A modern web browser What is inside the book JavaScript Basics Popup Message JavaScript Variables JavaScript Operators JavaScript Decision Making JavaScript Loops JavaScript Functions JavaScript Objects JavaScript Events JavaScript Validation The Document Object Model Browser Object Model JavaScript Cookies Object Oriented Programming Multimedia Error Handling Regular Expressions Image Map Page Redirection *JavaScript Coding for Teens* Andrew Yueh,2022-01-11 Everything teens need to get started with JavaScript Have you ever wanted to make your own game How about an awesome website Then JavaScript Coding for Teens is the book for you It doesn t matter if you re not sure what a variable is are stumped about syntax or don t even know how to use JavaScript on your computer This simple guide to coding for beginners walks you through every part of the process with easy to understand language and straightforward directions You ll be coding like a pro in no time JavaScript Coding for Teens includes Beginner friendly lessons This guide to coding for teens starts out with the basics providing the perfect foundation for coding novices A variety of uses Stretch your skills and discover how amazingly flexible and powerful JavaScript is as you learn to use it for programming websites and games Practical practice Gain confidence with exercises that test your ability to modify existing

programs or create new ones Build computer skills that will last a lifetime with JavaScript Coding for Teens **A Student's Guide to the Study, Practice, and Tools of Modern Mathematics** Donald Bindner, Martin Erickson, 2010-11-29 A Student's Guide to the Study Practice and Tools of Modern Mathematics provides an accessible introduction to the world of mathematics It offers tips on how to study and write mathematics as well as how to use various mathematical tools from LaTeX and Beamer to Mathematica and Maple to MATLAB and R Along with a color insert the text include *Instructor's Manual: Im Javascript* Willard, 2001-10 **The Absolute Beginner's Guide to Learn Database Programming Using Python GUI with PostgreSQL and SQL Server** Vivian Siahaan, Rismon Hasiholan Sianipar, 2020-01-16 This book is a comprehensive guide to Python as one of the fastest growing computer languages including Web and Internet applications This clear and concise introduction to the Python language is aimed at readers who are already familiar with programming in at least one language This hands on book introduces the essential topic of coding and the Python computer language to beginners and programmers of all ages This book explains relational theory in practice and demonstrates through two projects how you can apply it to your use of PostgreSQL and SQL Server databases This book covers the important requirements of teaching databases with a practical and progressive perspective This book offers the straightforward practical answers you need to help you do your job This hands on tutorial reference guide to PostgreSQL and SQL Server is not only perfect for students and beginners but it also works for experienced developers who aren't getting the most from both databases In designing a GUI and as an IDE you will make use Qt Designer In the first chapter you will learn to use several widgets in PyQt5 Display a welcome message Use the Radio Button widget Grouping radio buttons Displays options in the form of a check box and Display two groups of check boxes In chapter two you will learn to use the following topics Using Signal Slot Editor Copy and place text from one Line Edit widget to another Convert data types and make a simple calculator Use the Spin Box widget Use scrollbars and sliders Using the Widget List Select a number of list items from one Widget List and display them on another Widget List widget Add items to the Widget List Perform operations on the Widget List Use the Combo Box widget Displays data selected by the user from the Calendar Widget Creating a hotel reservation application and Display tabular data using Table Widgets In chapter three you will learn How to create the initial three tables project in the School database Teacher Class and Subject tables How to create database configuration files How to create a Python GUI for inserting and editing tables How to create a Python GUI to join and query the three tables In chapter four you will learn how to Create a main form to connect all forms Create a project will add three more tables to the school database Student Parent and Tuition tables Create a Python GUI for inserting and editing tables Create a Python GUI to join and query over the three tables In chapter five you will join the six classes Teacher TClass Subject Student Parent and Tuition and make queries over those tables In chapter six you will get introduction of postgresql And then you will learn querying data from the postgresql using Python including establishing a database connection creating a statement object executing the query

processing the resultset object querying data using a statement that returns multiple rows querying data using a statement that has parameters inserting data into a table using Python updating data in postgresql database using Python calling postgresql stored function using Python deleting data from a postgresql table using Python and postgresql Python transaction In chapter seven you will create and configure PostgreSQL database In this chapter you will create Suspect table in crime database This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo You will also create GUI to display edit insert and delete for this table In chapter eight you will create a table with the name Feature_Extraction which has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 The six fields except keys will have a VARCHAR data type 200 You will also create GUI to display edit insert and delete for this table In chapter nine you will create two tables Police and Investigator The Police table has six columns police_id primary key province city address telephone and photo The Investigator table has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo You will also create GUI to display edit insert and delete for both tables In chapter ten you will create two tables Victim and Case_File The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File table has seven columns case_file_id primary key suspect_id foreign key police_id foreign key investigator_id foreign key victim_id foreign key status and description You will create GUI to display edit insert and delete for both tables as well

JavaScript, A Beginner's Guide, Third Edition John Pollock, 2009-09-11 Essential Skills Made Easy Create dynamic Web pages complete with special effects using today's leading Web development language JavaScript A Beginner's Guide Third Edition gives you step by step coverage of the fundamentals including variables functions operators event handlers objects arrays strings forms and frames You'll also learn about more advanced techniques including debugging and security This hands on guide explains how JavaScript works with XHTML Transitional and covers the new features available in JavaScript Get started using JavaScript right away with help from this fast paced tutorial Designed for Easy Learning Key Skills Concepts Chapter opening lists of specific skills covered in the chapter Ask the Expert Q A sections filled with bonus information and helpful tips Try This Hands on exercises that show you how to apply your skills Notes Extra information related to the topic being covered Tips Helpful reminders or alternate ways of doing things Self Tests End of chapter reviews to test your knowledge Annotated syntax Example code with commentary that describes the programming techniques being illustrated

JAVASCRIPT Programming, for Beginners, Quick Start Guide! Ray Yao, 2020-11-16 About This Book This is a programming textbook from the remote east It received neither much applause nor many flowers Sometimes an excellent textbook may be unknown to any people on this side of the globe while it is very hot and popular on that side of the globe instead Actually this textbook has successfully cultivated millions of programming beginners high school and college computer students in the far away

east For people here this textbook is full of exotic and strange style However it is wise for you to learn multicultural skills from different angles Namely standing another standpoint to study this textbook you will not only have the outstanding ability of the people in here but also the smart wisdom of the people in there Finally you are bound to become a great engineer in the IT field Absolutely for Beginners JavaScript Programming it covers all essential JavaScript language knowledge You can learn complete primary skills of JavaScript programming fast and easily The textbook includes many practical examples for beginners and includes exercises for the college final exam the engineer certification exam and the job interview exam Note This textbook is only suitable for the JavaScript programming beginners high school and college students it is not for the experienced JavaScript programmers Table of Contents Chapter 1 JavaScript Basic What is JavaScript Comment Chapter 2 Operators Arithmetical Operators Logical Operators Chapter 3 Array Create an Array Show array element values Chapter 4 Math Time Math Methods Greater Less Chapter 5 String String length Join Strings Chapter 6 Object Object Declaration Navigate Web Page Chapter 7 Event HTML Basic Click Event Chapter 8 Form Dom Form Basic The Element of the form Access the Form JavaScript Q A Questions Answers Click the Buy button now Start coding today

The Absolute Beginner's Guide to Learn Database Programming Using Python GUI with MariaDB and SQL Server Vivian Siahaan, Rismon Hasiholan Sianipar, 2020-01-16 This book is designed to introduce programmers to programming and computational thinking through the lens of exploring database This book offers Python programmers one place to look when they need help guiding to Python as one of the fastest growing computer languages including Web and Internet applications This clear and concise introduction to the Python language is aimed at readers who are already familiar with programming in at least one language This hands on book introduces the essential topic of coding and the Python computer language to beginners and programmers of all ages This book explains relational theory in practice and demonstrates through two projects how you can apply it to your use of MariaDB and SQL Server databases This book covers the important requirements of teaching databases with a practical and progressive perspective This book offers the straightforward practical answers you need to help you do your job This hands on tutorial reference guide to MariaDB and SQL Server is not only perfect for students and beginners but it also works for experienced developers who aren't getting the most from both databases In designing a GUI and as an IDE you will make use Qt Designer In the first chapter you will learn to use several widgets in PyQt5 Display a welcome message Use the Radio Button widget Grouping radio buttons Displays options in the form of a check box and Display two groups of check boxes In chapter two you will learn to use the following topics Using Signal Slot Editor Copy and place text from one Line Edit widget to another Convert data types and make a simple calculator Use the Spin Box widget Use scrollbars and sliders Using the Widget List Select a number of list items from one Widget List and display them on another Widget List widget Add items to the Widget List Perform operations on the Widget List Use the Combo Box widget Displays data selected by the user from the Calendar Widget Creating a hotel

reservation application and Display tabular data using Table Widgets In chapter three you will learn How to create the initial three tables project in the School database Teacher Class and Subject tables How to create database configuration files How to create a Python GUI for inserting and editing tables How to create a Python GUI to join and query the three tables In chapter four you will learn how to Create a main form to connect all forms Create a project will add three more tables to the school database Student Parent and Tuition tables Create a Python GUI for inserting and editing tables Create a Python GUI to join and query over the three tables In chapter five you will join the six classes Teacher TClass Subject Student Parent and Tuition and make queries over those tables In chapter six you will create dan configure database In this chapter you will create Suspect table in crime database This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo You will also create GUI to display edit insert and delete for this table In chapter seven you will create a table with the name Feature_Extraction which has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 The six fields except keys will have a VARCHAR data type 200 You will also create GUI to display edit insert and delete for this table In chapter eight you will create two tables Police and Investigator The Police table has six columns police_id primary key province city address telephone and photo The Investigator table has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo You will also create GUI to display edit insert and delete for both tables In chapter nine you will create two tables Victim and Case_File The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File table has seven columns case_file_id primary key suspect_id foreign key police_id foreign key investigator_id foreign key victim_id foreign key status and description You will create GUI to display edit insert and delete for both tables as well

Java In Action: An Excellent Guide to Explore JDBC And Database Applications Vivian Siahaan, Rismon Hasiholan Sianipar, 2019-11-27 This step by step guide to explore database programming using Java is ideal for people with little or no programming experience The goal of this concise book is not just to teach you Java but to help you think like a programmer Each brief chapter covers the material for one week of a college course to help you practice what you ve learned As you would expect this book shows how to build from scratch two different databases PostgreSQL and SQLite using Java In designing a GUI and as an IDE you will make use of the NetBeans tool In the first chapter you will learn How to install NetBeans JDK 11 and the PostgreSQL connector How to integrate external libraries into projects How the basic PostgreSQL commands are used How to query statements to create databases create tables fill tables and manipulate table contents is done In the first chapter you will learn How to install NetBeans JDK 11 and the PostgreSQL connector How to integrate external libraries into projects How the basic PostgreSQL commands are used How to query statements to create databases create tables fill tables and manipulate table contents is done In the second chapter you will learn querying data from the

postgresql using jdbc including establishing a database connection creating a statement object executing the query processing the resultset object querying data using a statement that returns multiple rows querying data using a statement that has parameters inserting data into a table using jdbc updating data in postgresql database using jdbc calling postgresql stored function using jdbc deleting data from a postgresql table using jdbc and postgresql jdbc transaction In chapter three you will create a PostgreSQL database named School and its tables In chapter four you will study Creating the initial three table projects in the school database Teacher table TClass table and Subject table Creating database configuration files Creating a Java GUI for viewing and navigating the contents of each table Creating a Java GUI for inserting and editing tables and Creating a Java GUI to join and query the three tables In chapter five you will learn Creating the main form to connect all forms Creating a project will add three more tables to the school database the Student table the Parent table and Tuition table Creating a Java GUI to view and navigate the contents of each table Creating a Java GUI for editing inserting and deleting records in each table Creating a Java GUI to join and query the three tables and all six In chapter six you will study how to query the six tables In chapter seven you will be shown how to create SQLite database and tables with Java In chapter eight you will be taught how to extract image features utilizing BufferedImage class in Java GUI Digital image techniques to extract image features used in this chapter are grascaling sharpening inverting blurring dilation erosion closing opening vertical prewitt horizontal prewitt Laplacian horizontal sobel and vertical sobel For readers you can develop it to store other advanced image features based on descriptors such as SIFT and others for developing descriptor based matching In chapter nine you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter ten you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In chapter eleven you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter twelve you will add two tables Victim and Case_File The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File has seven columns case_file_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete

data in both tables Finally this book is hopefully useful and can improve database programming skills for every Java PostgreSQL SQLite programmer [Java Programming For Developers: The Definitive Guide to Learn JDBC And Database Applications](#) Vivian Siahaan, Rismon Hasiholan Sianipar, 2019-11-28 This step by step guide to explore database programming using Java is ideal for people with little or no programming experience The goal of this concise book is not just to teach you Java but to help you think like a programmer Each brief chapter covers the material for one week of a college course to help you practice what you've learned As you would expect this book shows how to build from scratch two different databases MariaDB and SQLite using Java In designing a GUI and as an IDE you will make use of the NetBeans tool In the first chapter you will learn the basics of cryptography using Java Here you will learn how to write a Java program to count Hash MAC Message Authentication Code store keys in a KeyStore generate PrivateKey and PublicKey encrypt decrypt data and generate and verify digital prints In the second chapter you will learn how to create and store salt passwords and verify them You will create a Login table In this case you will see how to create a Java GUI using NetBeans to implement it In addition to the Login table in this chapter you will also create a Client table In the case of the Client table you will learn how to generate and save public and private keys into a database You will also learn how to encrypt decrypt data and save the results into a database In the third chapter you will create an Account table This account table has the following ten fields account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In this case you will learn how to implement generating and verifying digital prints and storing the results into a database In the fourth chapter You create a table with the name of the Account which has ten columns account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In the fifth chapter you will create a Client_Data table which has the following seven fields client_data_id primary key account_id primary_key birth_date address mother_name telephone and photo_path In chapter six you will be shown how to create SQLite database and tables with Java In chapter seven you will be taught how to extract image features utilizing BufferedImage class in Java GUI Digital image techniques to extract image features used in this chapter are grascaling sharpening inverting blurring dilation erosion closing opening vertical prewitt horizontal prewitt Laplacian horizontal sobel and vertical sobel For readers you can develop it to store other advanced image features based on descriptors such as SIFT and others for developing descriptor based matching In chapter eight you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter nine you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of

the feature will be directly saved into this table In chapter ten you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter eleven you will add two tables Victim and Case_File The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File has seven columns case_file_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables Finally this book is hopefully useful and can improve database programming skills for every Java MariaDB SQLite programmer

The Self-Taught Coder: The Definitive Guide to Database Programming with Python and MySQL
Vivian Siahaan, Rismon Hasiholan Sianipar, 2019-02-19 You will learn Python MySQL fast easy and fun This book provides you with a complete MySQL guidance presented in an easy to follow manner This Python MySQL book shows you how to use MySQL connector Python to access MySQL databases You will learn how to connect to MySQL database and perform common database operations such as SELECT INSERT UPDATE and DELETE In addition we will show you some useful tips such as how to call MySQL stored procedures from Python and how to work with MySQL BLOB data Each chapter has practical examples with SQL script and screenshots available If you go through the entire chapters you will know how to manage MySQL databases and manipulate data using various techniques such as MySQL queries MySQL stored procedures database views triggers In the first part of the book you will learn Basic MySQL statements including how to implement querying data sorting data filtering data joining tables grouping data subquerying data and setting operators Aside from learning basic SQL statements you will also learn step by step how to develop stored procedures in MySQL First we introduce you to the stored procedure concept and discuss when you should use it Then we show you how to use the basic elements of the procedure code such as create procedure statement if else case loop stored procedure s parameters In the next chapter we will discuss the database views how they are implemented in MySQL and how to use them more effectively After that you will learn how to work with the MySQL triggers By definition a trigger or database trigger is a stored program executed automatically to respond to a specific event e g insert update or delete occurred in a table The database trigger is powerful tool for protecting the integrity of the data in your MySQL databases In addition it is useful to automate some database operations such as logging auditing etc Then you will learn about MySQL index including creating indexes removing indexes listing all indexes of a table and other important features of indexes in MySQL MySQL uses indexes to quickly find rows with specific column values Without an index MySQL must scan the whole table to locate the relevant rows

The larger table the slower it searches After that you will find a lot of useful MySQL administration techniques including MySQL server startup and shutdown MySQL server security MySQL database maintenance and backup The last chapter gives you the most commonly used MySQL functions including aggregate functions string functions date time functions control flow functions etc

JavaScript for Kids Moaml Mohmmmed,2019-07-26 JavaScript for kidsA fun guide to learning Java Script for kidsWelcome to JavaScript for Kids In this book you ll learn to program with JavaScript the language of the Web But more than that you ll become a programmer someone who not only uses computers but also controls them Once you learn to program you can bend computers to your will and make them do whatever you want JavaScript is a great programming language to learn because it s used everywhere Web browsers like Chrome Firefox and Internet Explorer all use JavaScript With the power of JavaScript web programmers can transform web pages from simple documents into full blown interactive applications and games But you re not limited to building web pages JavaScript can run on web servers to create whole websites and can even be used to control robots and other hardware Who Should Read This Book This book is for anyone who wants to learn JavaScript or to start programming for the first time The book is designed to be kid friendly but it can serve as a first programming book for beginners of all ages With this book you ll build up your knowledge of JavaScript gradually starting with JavaScript s simple data types before moving onto complex types control structures and functions After that you ll learn how to write code that reacts when the user moves the mouse or presses a key on the keyboard Finally you ll learn about the canvas element which lets you use JavaScript to draw and animate anything you can imagine

Learn JDBC The Hard Way: A Hands-On Guide to PostgreSQL and SQL Server Driven Programming Vivian Siahaan, Rismon Hasiholan Sianipar,2019-11-23 This book offers the straightforward practical answers you need to help you do your job This hands on tutorial reference guide to PostgreSQL and SQL Server is not only perfect for students and beginners but it also works for experienced developers who aren t getting the most from PostgreSQL and SQL Server As you would expect this book shows how to build from scratch two different databases PostgreSQL and SQL Server using Java In designing a GUI and as an IDE you will make use of the NetBeans tool In chapter one you will learn How to install NetBeans JDK 11 and the PostgreSQL connector How to integrate external libraries into projects How the basic PostgreSQL commands are used How to query statements to create databases create tables fill tables and manipulate table contents is done In chapter two you will learn querying data from the postgresql using jdbc including establishing a database connection creating a statement object executing the query processing the resultset object querying data using a statement that returns multiple rows querying data using a statement that has parameters inserting data into a table using jdbc updating data in postgresql database using jdbc calling postgresql stored function using jdbc deleting data from a postgresql table using jdbc and postgresql jdbc transaction In chapter three you will learn the basics of cryptography using Java Here you will learn how to write a Java program to count Hash MAC Message Authentication Code store keys in a KeyStore generate PrivateKey and

PublicKey encrypt decrypt data and generate and verify digital prints You will also learn how to create and store salt passwords and verify them In chapter four you will create a PostgreSQL database named Bank and its tables In chapter five you will create a Login table In this case you will see how to create a Java GUI using NetBeans to implement it In addition to the Login table in this chapter you will also create a Client table In the case of the Client table you will learn how to generate and save public and private keys into a database You will also learn how to encrypt decrypt data and save the results into a database In chapter six you will create an Account table This account table has the following ten fields account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In this case you will learn how to implement generating and verifying digital prints and storing the results into a database In chapter seven you create a table named Client_Data which has seven columns client_data_id primary key account_id primary_key birth_date address mother_name telephone and photo_path In chapter eight you will be taught how to create a SQL Server database named Crime and its tables In chapter nine you will be taught how to extract image features utilizing BufferedImage class in Java GUI In chapter ten you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter eleven you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 In chapter twelve you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter thirteen you will add two tables Victim and File_Case The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The File_Case has seven columns file_case_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables Finally this book is hopefully useful and can improve database programming skills for every Java PostgreSQL SQL Server programmer

Javascript Students Guide Introduction

In today's digital age, the availability of Javascript Students Guide books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Javascript Students Guide books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Javascript Students Guide books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Javascript Students Guide versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Javascript Students Guide books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Javascript Students Guide books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Javascript Students Guide books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Javascript Students Guide books and manuals for download have transformed the way we access

information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of JavaScript Students Guide books and manuals for download and embark on your journey of knowledge?
