Emotion And Value:

Emotion and Value Sabine Roeser, Cain Todd, 2014-11-06 This volume brings together new work by leading philosophers on the topics of emotion and value and explores issues at their intersection Philosophers and psychologists working on the emotions have reached something of a consensus about the complex inter related nature of the affective and cognitive components of emotions and have increasingly focussed on the important epistemological role that emotions play in giving us access to values At the same time an increasing number of philosophers have become attracted to analyses of value that give emotions a prominent place in evaluative judgements and experiences The work undertaken in each of these areas has important implications for current research on topics such as the role that emotions play in practical rationality and moral psychology the connection between imagination and emotion in the appreciation of fiction and more generally with the ability of emotions to discern axiological saliences and to ground or fail to ground the objectivity of ethical or aesthetic value judgements This volume makes a unique contribution to scholarship on emotion and value by bringing together top authors from these lines of research In addition the volume contains a number of contributions that explore various links between the emotions and self understanding touching on a range of themes that include depression empathy agency guilt and self trust All of these issues are approached from a number of different perspectives in order to present the reader with a wide view of this extremely rich terrain and to demonstrate how the latest thinking in a number of currently intensive areas of research is deeply interconnected

The Development of Emotions Francine Lea Kitchen,1983 Emotions, Values, and the Law John Deigh,2008-10-24 Emotions Values and the Law brings together ten of John Deigh s essays written over the past fifteen years In the first five essays Deigh ask questions about the nature of emotions and the relation of evaluative judgment to the intentionality of emotions and critically examines the cognitivist theories of emotion that have dominated philosophy and psychology over the past thirty years A central criticism of these theories is that they do not satisfactorily account for the emotions of babies or animals other than human beings Drawing on this criticism Deigh develops an alternative theory of the intentionality of emotions on which the education of emotions explains how human emotions which innately contain no evaluative thought come to have evaluative judgments as their principal cognitive component The second group of five essays challenge the idea of the voluntary as essential to understanding moral responsibility moral commitment political obligation and other moral and political phenomena that have traditionally been thought to depend on people s will Each of these studies focuses on a different aspect of our common moral and political life and shows contrary to conventional opinion that it does not depend on voluntary action or the exercise of a will constituted solely by rational thought Together the essays in this collection represent an effort to shift our understanding of the phenomena traditionally studied in moral and political philosophy from that of their being products of reason and will operating independently of feeling and sentiment to that of their being manifestations of the work of emotion Deigh s writing is clear and precise his arguments are strong and he uses a wide range of real world examples that give his essays a vibrant and very readable character Notre Dame Philosophical Reviews I believe that Deigh is as clear headed and insightful a philosopher as is currently at work today in the areas of moral political and legal philosophy and moral psychology and I believe these essays beautifully demonstrate his many virtues Herbert Morris University of California Low Angeles Law School John Deigh has acquired a very good knowledge of a field which he has very much made his own No one writes better or thinks more productively on that area of thought where the theory of the emotions psychoanalysis value theory and the theory of law intersect And if we closely connect the name Deigh with this particular concatenation of topics I believe that very soon there will be a number of voices clamoring to be heard in this area Richard Wollheim University of California Berkeley *Emotional Intelligence for Emerging Leaders and Entrepreneurs - Illustrating the Fortune Giants* Sehba Husain,2014-07-16 Emotional Intelligence for Emerging Leaders and Entrepreneurs

Fact and Value in Emotion Louis C. Charland,Peter Zachar,2008 There is a large amount of scientific work on emotion in psychology neuroscience biology physiology and psychiatry which assumes that it is possible to study emotions and other affective states objectively Emotion science of this sort is concerned primarily with facts and not values with description not prescription The assumption behind this vision of emotion science is that it is possible to distinguish factual from evaluative aspects of affectivity and emotion and study one without the other But what really is the basis for distinguishing fact and value in emotion and affectivity And can the distinction withstand careful scientific and philosophical scrutiny The essays in this collection all suggest that the problems behind this vision of emotion science may be more complex than is commonly supposed
