Dutch Figure Drawings from the Seventeenth Century Peter Schatborn,Rijksmuseum (Netherlands). Rijksprentenkabinet,National Gallery of Art (U.S.),1981 Contrary to our conception of Italian and Spanish drawing figure studies are not the first works that come to mind when one imagines the panorama of Dutch drawing from Holland s flourishing period One might think first about the quiet landscapes of Van Goyen river views under a high sky with a ferry boat transporting travelers or about cattle with a shepherd in the shade of a willow as depicted by Cuyp or Potter Another will see Ruisdael s heavy trees Molijn s views of dunes or the woods of Waterloo For many the images are lively scenes at a public house by Ostade or colorful ice scenes by Averkamp and nobody will forget the butterflies and insects and the shells and flowers which were famous in such great numbers throughout the entire 17th century Studies of the human figure are initially somewhat out of the picture And what about Rembrandt then Yes those who think about his drawn cruvre see directly next to his biblical compositions landscapes beggars and Orientals nude models posing at the border of light and dark rapid and precise figure sketches with the reed pen sometimes four or five together on one sheet In the extremely versatile cruvre of Rembrandt we find our first ideas about Dutch drawings corrected and now figure drawings by other artists also appear in the field of vision Through closer observation these drawings appear in always greater numbers in ever richer variation of type and in unexpected colorful
