of the editors of this series of books Professor Dr H List and Professor Dr A Pischinger to write a book summarizing the present state of the art A center of activity of the Institute of Internal Combustion Engines and Automotive Engineering at the Vienna Technical University which I am heading is the field of mixture formation there fore many new results that have been achieved in this area in collaboration with the respective industry have been included in this volume The basic principles of combustion are discussed only to that extent which seemect necessary for an understanding of the effects of mixture formation The focal point of this volume is the mixture formation in spark ignition engines covering both the theory and actual design of the mixture formation units and appropriate intake manifolds Also the related measurement technology is explained in this work
