### control remoto universal para tres componentes

#### Instalación de las baterías

Su control remoto universal utiliza 2 baterías alcalinas AA (Las baterías pueden o no estar incluidas, dependiendo del modelo).

Instalación de las baterías:

1. Levante la tapa del compartimento de las baterías.
2. Instale las baterías, haciendo coincidir las baterías con los símbolos (+) y (-) que están en el compartimento.
3. Presione y empuje la tapa del compartimento para colocarla de nuevo en su lugar.

**Nota:** Puede que sea necesario reprogramar el control después de reemplazar las baterías.

#### Ahorro de energía de las baterías

Su control remoto ahorra energía de la batería al desconectarse automáticamente al oprimir cualquier tecla por más de 60 segundos. Esto le ahorra baterías en el caso de que el control remoto se atore en un lugar donde las teclas permanezcan oprimidas, como por ejemplo entre las sillas de un sofá.

#### Iluminación de fondo

La iluminación de fondo (disponible solamente en algunos modelos) le permite ver mejor las teclas en la oscuridad. La iluminación de fondo se activa y desactiva oprimiendo sucesivamente la tecla **BACKLIGHT**. Al activarse, la iluminación de fondo permanece encendida mientras se oprimen teclas. La iluminación de fondo se apaga seis segundos después de oprimir la última tecla. Una vez que se haya vencido el tiempo de la iluminación de fondo, oprimir cualquier tecla la reactivará. Si la iluminación de fondo está encendida, y se oprime la tecla **BACKLIGHT**, la iluminación de fondo se apagará.

#### Tecla iluminada ON+OFF

La tecla **ON+OFF** enciende y apaga los componentes. También se ilumina para servir como luz de indicación, y suministra información para varias funciones. Al oprimir una tecla válida, la tecla iluminada **ON+OFF** permanecerá encendida mientras la tecla esté oprimida y se apagará al soltarla. La tecla **ON+OFF** también proporciona para suministrar información cuando está en el Modo de Programar o en el Modo Menu.

#### Programación del control remoto

Para que su control remoto universal pueda controlar sus componentes, necesita programarlo con los códigos que corresponden a los componentes (consulte la lista de códigos anexa). Estos códigos permiten que el control remoto se comunique con sus componentes. Cada marca y cada componente tiene su propio "idioma", y al programar los códigos correctos, le está diciendo al control remoto que "hable el mismo idioma" que sus componentes.

**¡Importante!** Al programar cada tecla, asegúrese que el control remoto apunta hacia el sensor infrarrojo del componente que está programando.

#### Métodos de programación

##### Programación manual directa del código

Para programar manualmente su control remoto universal para que controle sus componentes, siga los siguientes pasos:

1. Encienda manualmente el componente que desea controlar con el control remoto (Televisión, VCR, DVD, decodificador de satélite o de cable).
2. Localice las listas de códigos anexas. Encuentre la lista del componente que desea programar. Encuentre la marca del componente. Verá una lista de códigos de cuatro dígitos para cada marca. Si su marca no está en la lista, use uno de los métodos de Búsqueda de código para programar el control remoto.
3. Oprima y mantenga oprimida la tecla del componente (TV, DVD-VCR, SAT-CBL) que desea programar. La tecla iluminada **ON+OFF** se enciende y permanece encendida. Si en algún momento durante el procedimiento de Programación manual directa del

cuatro veces al soltar la tecla del componente. Esto indica que ha ocurrido un error de programación. En este caso, repita el proceso de Programación manual directa del código desde el paso 2 y pruebe el próximo código en la lista.

6. Pruebe el componente para confirmar que la tecla del componente está programada con el código correcto que logra el mejor funcionamiento. Trate de controlar diferentes funciones del componente usando el control remoto. Si algunas de las funciones del componente no operan, pruebe programando el control remoto con otro código de la lista hasta que encuentre el código que le permita al control remoto de la mayoría de las funciones del componente. Diferentes códigos le permitirán diferentes niveles de funcionamiento.

7. Recuerde colocar el código en el espacio correspondiente en la sección Recuperación del Código de este manual, para referencias futuras.

##### Búsqueda de código de marca y selección

Si su marca está en la lista de códigos de marca (ver lista anexa), puede programar su control remoto universal buscando solamente en la lista de códigos de esa fabricante específica. La búsqueda de código de marca y selección puede ser el método más rápido de programar su control remoto, si la marca de su componente (televisión, DVD, VCR, y decodificador de satélite o cable) es una de la lista.

Si su marca no está en la lista, use uno de los otros métodos de programación que se indican a continuación.

##### GO BACK

**¡Importante!** Para salir sin guardar ninguna información durante la Búsqueda de código, oprima y suelte la tecla **GO BACK**.

1. Encienda manualmente el componente que desea controlar con el control remoto.
2. Localice los códigos de la marca en la lista de códigos y manténgalos a mano.

**Nota:** Si oprime una tecla inválida durante la Búsqueda del código de marca, el control remoto no responderá. Si no oprime una tecla válida de Búsqueda del código de marca (TV, DVD-VCR, SAT-CBL, ON+OFF, GO BACK, y las teclas numéricas 0-9), la búsqueda se cancelará automáticamente después de dos minutos. Cuando se cancele la búsqueda por tiempo, la tecla iluminada **ON+OFF** parpadeará cuatro veces y se apagará. El último código programado en la tecla del componente quedará en la memoria.

3. Oprima y mantenga oprimida la tecla del componente (TV, DVD-VCR, SAT-CBL) que desea programar. La tecla iluminada **ON+OFF** se enciende y permanece encendida.

4. Mientras mantiene oprimida la tecla del componente, oprima y mantenga oprimida la tecla **ON+OFF**. La tecla iluminada **ON+OFF** se apaga.

5. Después de mantener ambas teclas oprimidas por tres segundos, la tecla iluminada **ON+OFF** se enciende nuevamente.

6. Suelte ambas teclas. La tecla iluminada **ON+OFF** permanecerá encendida.

7. Consulte los Códigos de marca en las Listas de códigos anexas. Oprima y suelte la tecla de código de marca correspondiente (Televisión 0-9), usando las teclas del teclado numérico. La tecla iluminada **ON+OFF** parpadeará una vez.

8. Oprima y suelte la tecla **ON+OFF** repetidamente hasta que su componente se apague. Espere cuatro segundos antes de oprimir la tecla cada vez. Cada vez que oprima la tecla **ON+OFF**, la tecla iluminada **ON+OFF** parpadeará y se emitirá el próximo código. La Búsqueda del código de marca comienza con el primer código en la lista seleccionada de la marca para ese componente, y realiza un ciclo completo por todos los códigos de dicha marca. Si su componente se apaga, ha encontrado el código correcto. (Si completa el ciclo y la tecla iluminada **ON+OFF** parpadeará cuatro veces y se apagará, significa que se han probado todos los códigos de la lista de la marca seleccionada y debe probarse otro método de programación. Se sale del modo Búsqueda del código de marca).

9. Una vez que haya encontrado el código correcto, debe guardar dicho código oprimiendo y soltando la tecla **STOP**. La tecla iluminada **ON+OFF** se apaga. Debe oprimir la tecla **STOP** para guardar el código, si no, el código no quedará almacenado en la memoria.

10. Pruebe el componente para confirmar que la tecla del componente está programada con el código correcto para lograr el mejor funcionamiento. Trate de controlar diferentes funciones del componente usando el control remoto. Si algunas de las funciones del componente no operan, pruebe programando el control remoto usando otro método de programación. Recuerde guardar el código programado por el control remoto.

##### Búsqueda manual del código y selección

Si la marca de su componente no está en la lista de códigos, o si probó todos los códigos de su marca y el control remoto no funciona con su componente, pruebe la Búsqueda manual del código. Este método recorre el ciclo de todos los códigos de la lista.

El método de Búsqueda manual del código puede tomar un largo tiempo porque el control remoto busca en todos los códigos de la memoria, el código que opera su componente.

**¡Importante!** Como hay tantos códigos, puede ser que tenga que oprimir la tecla **ON+OFF** muchas veces — posiblemente hasta 200 veces.

##### GO BACK

**¡Importante!** Para salir sin guardar ninguna información en cualquier momento durante la Búsqueda manual del código, oprima y suelte la tecla **GO BACK**.

1. Encienda manualmente el componente que desea controlar con el control remoto.
2. Oprima y mantenga oprimida la tecla del componente (TV, DVD-VCR, SAT-CBL)
