Tintinalli's Emergency Medicine: A Comprehensive Study Guide, 8th edition Judith E. Tintinalli, J. Stephan Stapczynski, O. John Ma, David M. Cline, Garth D. Meckler, 2016-03-22 The most widely used and highly regarded textbook and reference of emergency medicine Endorsed by the American College of Emergency Physicians The 8th edition of Tintinalli's Emergency Medicine provides the depth and breadth of coverage that reflects the complexity and expertise needed to practice emergency medicine

successfully in today's fast-paced environments. It is an important contemporary clinical emergency care resource for physicians, NPs, and PAs who practice emergency medicine and for emergency medicine and pediatric emergency medicine fellows. It remains the preferred study guide for in-training and board examinations and recertification. NEW to this edition: Full color design with more tables than ever to succinctly present key information. Extensive updates to all sections incorporating the latest guidelines, evidence-based protocols, and relevant research. Expanded pediatric section with complete clinical information for general and pediatric emergency physicians. Expanded coverage of common emergency department procedures with improved illustrations. Online access to more than 30 videos covering a wide range of procedural and diagnostic topics and focusing on the latest ultrasound-guided techniques. From the reviews of the seventh edition: Collectively they have once again produced an excellent text that manages to cover the broad scope of emergency medicine while remaining an easily readable and practical resource. Last, for the inevitable comparison of this current edition of Tintinalli's Emergency Medicine with other available emergency medicine textbooks available in my opinion, Tintinalli's still comes out on top. It is more concise and easier to read than some, yet it covers the breadth of emergency medicine practice more comprehensively than others. Just as previous editions did, the seventh presents all of the most pertinent and up-to-date information in a well-organized format that is comprehensive yet easy to read. That and many of the attractive new features in this current edition will ensure its place on my bookshelf for years to come. JAMA

National Incident Management System (NIMS) Supporting Technology Evaluation Program (STEP) Guide U. s. Department of Homeland Security, Federal Emergency Management Agency, 2013-02-10. This document is a comprehensive guide to the National Incident Management System Supporting Technology Evaluation Program. NIMS STEP Evaluation activities are sponsored by the National Preparedness Directorate, NPD, Federal Emergency Management Agency, FEMA. This guide is designed to provide an orientation to the evaluation process and policies, including vendor application requirements, product selection, methods, evaluation activities, and post-evaluation review reporting processes. Homeland Security Presidential Directive HSPD 5 directed the Secretary of Homeland Security to develop and administer the National Incident Management System (NIMS). In 2004, the Department of Homeland Security (DHS) released NIMS to provide a consistent nationwide template to enable governments and responders to work together effectively and efficiently to manage incidents and planned events. Although the incident management framework can be adaptable to any situation, NIMS provides a standard structure and management concepts that transcend all incidents, including: Accountability, Common Terminology, Comprehensive Resource Management, Information and Intelligence Management, Integrated Communications Management, Span of Control, Modular Organization, Unified Command Structure. The NIMS provides a framework and sets forth, among others, the requirement for interoperability and compatibility to enable a diverse set of public and private organizations to conduct well-integrated and effective incident management operations. Systems operating in an incident management environment must be able to work

together and not interfere with one another Interoperability and compatibility are achieved through the use of tools such as common communications and data standards Establishing and maintaining a common operating picture and ensuring accessibility and interoperability are the principal goals of the Communication and Information Management component of NIMS The NIMS STEP supports NIMS implementation by providing an objective evaluation of supporting technologies the use and incorporation of new and existing technologies to improve efficiency and effectiveness in all aspects of incident management The Incident Management Systems Integration IMSI Division of NPD has tasked the NIMS Support Center NIMS SC to support and manage the day to day functions of the program
