The screenshot shows a Jupyter Notebook interface with a dark theme. At the top, the text 'jupyter NLP Tutorial Last Checkpoint and hour ago' is visible. The notebook contains three code cells. The first cell defines a sentence 'NE\_sent'. The second cell tokenizes the sentence and tags the tokens. The third cell uses 'nltk.chunk' to identify named entities and prints the result. The output shows a list of tuples representing named entities and their parts of speech. The fourth cell defines a new sentence 'new' and tokenizes it. The fifth cell prints the output of the tokenization, showing a list of tuples for each word and its part of speech.
