ELT draws its works in Dewey, Lewin, and Piaget's experiential works. Kolb's article (2005) quote Lewin's work saying "There is nothing as practical as a good theory" (p. 193). Also, it quotes Dewey's statement that "There is a need of forming a theory of experience in order that education may be intelligently conducted upon the basis of experience" (p.193). ELT has been shown to be more holistic than behavioral or cognitive learning theories. For effective learning to transpire, ELT follows a four cyclical process of the learning experience. "Concrete experience (CE) and abstract conceptualization (AC) depicts two polar opposite dimensions of transforming grasping experience while reflective observation (RO) and active experimentation (AE) depicts two polar opposite dimensions of transforming the experience (Kolb, 2005). ELT constructs knowledge by creating tension among the four capabilities of learning. In each specific learning situation, the student must incessantly decide which capability of learning to use. In the experience of grasping, the student takes in new info by undergoing via concrete, tangible, the world felt qualities, depending on their sanity and immersing themselves in concrete realism. The opposite can also happen where the learner can experience theoretical conceptualization. This style of learning
