

Exchange Server 2010 Configurations are a lot different from Exchange 2003 but not much than Exchange 2007. Both are nearly identical.

Now first part is just create two or three domain users in active directory users and computers as below.

Note: This is just create users only the main difference is that in Exchange 2003 creating a user in domain will ask wants to create mail box for that user. Now in Exchange 2007 and in 2010 this process is a different tasks. Will tell you more detail in later.

After that open Exchange Management Console. Your Exchange Server will be as follow.
