

Computer Networking

INTRODUCTION

Computer networks have made a major impact on the society as a powerful communication medium. Everyday thousands of PCs are bought by the users all around the world and majority of them are connected to each other. By using computer networking, one may reduce the amount of travelling, and thus save energy and time.

Computer network means a collection of autonomous computer interconnected by a single technology. A computer network is a collection of computers and peripheral devices such as printers etc., connected by communication links such as copper wire, microwaves infrared and communication satellites. Because of these links, components of network function simultaneously. A computer network can be created connecting two or millions of computers. A network can be as small as a local area network consisting of a few computers, printers and other devices.

FACT FILE

Ethernet is a family of computer networking technologies for local area networks (LANs).
Robert Melancton Metcalfe (born April 7, 1946 in Brooklyn, New York) is an electrical engineer from the United States who co-invented Ethernet.
