Whole C Multiplying and Dividing Fractions Study Guide

Notes
When multiplying fractions, you will multiply the numerators together and multiply the denominators together.

Example
$$\frac{1}{2} \times \frac{3}{4} = \frac{1 \times 3}{2 \times 4}$$

When dividing fractions, you first must calculate the reciprocal of the dividing fraction and then multiply the numerators together and multiply the denominators together.

Example

$\frac{1}{4} \div \frac{4}{5}$	\longrightarrow	$\frac{1}{4} \times \frac{5}{4}$
		\times
		$\frac{5}{16}$

A proper fraction is a fraction whose numerator is smaller than its denominator.
An improper fraction is a fraction whose numerator is equal to or greater than its denominator.

- Working**
- Numerator: the number above the line in a fraction
 - Denominator: the number below the line in a fraction
 - Reciprocal: the multiplicative inverse of a number
 - Mixed number: a number between whole numbers (e.g., $1\frac{1}{2}$)
