Date: _____

Student Exploration: Fan Cart Physics

Learning Objectives: After this activity, students should be able to:

- 1. Calculate average velocity and acceleration for the motion of an object.
- 2. Calculate the distance traveled by an object.

Prerequisite Knowledge: Displacement, Velocity, Acceleration, Time

1. Imagine a cart with a fan that can be switched on or off. The cart starts at the origin of a coordinate system.
 - a. What is the cart's position at the end of 10 seconds? _____
 - b. Suppose the cart's fan is switched on after 5 seconds. How far does the cart travel in the next 5 seconds? _____

Activity: This activity is a simulation of a fan cart. The fan cart is shown in the diagram below. The fan cart is shown in the diagram below. The fan cart is shown in the diagram below.

Warm-up

The Fan Cart Physics Simulation shows a fan cart with a fan that can be switched on or off. The fan cart is shown in the diagram below. The fan cart is shown in the diagram below.

1. Look at the fan cart. What is the fan cart's position at the end of 10 seconds? _____

2. Press the **Play** (**▶**) and **Restart** (**↺**) buttons. What is the fan cart's position at the end of 10 seconds? _____

By clicking the **Play** (**▶**) button, the fan cart starts moving. The fan cart is shown in the diagram below. The fan cart is shown in the diagram below.

3. The **Velocity** (**v**) of the cart is the speed and direction. Click **Mass** (**m**), **Speed** (**v**), **Time** (**t**), **Distance** (**d**), and **Start Play**. How do the velocity and speed of the cart change? _____

A change in velocity is called **acceleration**.

Announcer ,2004 **Exploring Signature Pedagogies** Regan A. R. Gurung,Nancy L. Chick,Aeron Haynie,2023-07-03
From the Foreword These authors have clearly shown the value in looking for the signature pedagogies of their disciplines Nothing uncovers hidden assumptions about desired knowledge skills and dispositions better than a careful examination of our most cherished practices The authors inspire specialists in other disciplines to do the same Furthermore they invite other colleagues to explore whether relatively new interdisciplinary fields such as Women s Studies and Global Studies have or should have a signature pedagogy consistent with their understanding of what it means to apprentice in these areas Anthony A Ciccone Senior Scholar and Director Carnegie Academy for the Scholarship of Teaching and Learning How do individual disciplines foster deep learning and get students to think like disciplinary experts With contributions from the sciences humanities and the arts this book critically explores how to best foster student learning within and across the disciplines This book represents a major advance in the Scholarship of Teaching and Learning SoTL by moving beyond individual case studies best practices and the work of individual scholars to focus on the unique content and characteristic pedagogies of major disciplines Each chapter begins by summarizing the SoTL literature on the pedagogies of a specific discipline and by examining and analyzing its traditional practices paying particular attention to how faculty evaluate success Each concludes by the articulating for its discipline the elements of a signature pedagogy that will improve teaching and learning and by offering an agenda for future research Each chapter explores what the pedagogical literature of the discipline suggests are the optimal ways to teach material in that field and to verify the resulting learning Each author is concerned about how to engage students in the ways of knowing the habits of mind and the values used by experts in his or her field Readers will not only benefit from the chapters most relevant to their disciplines As faculty members consider how their courses fit into the broader curriculum and relate to the other disciplines and design learning activities and goals not only within the discipline but also within the broader objectives of liberal education they will appreciate the cross disciplinary understandings this book affords

Matter and Interactions Ruth W. Chabay,Bruce A. Sherwood,2011 Matter and Interactions offers a modern curriculum for introductory physics calculus based It presents physics the way practicing physicists view their discipline and integrates 20th Century physics and computational physics The text emphasizes the small number of fundamental principles that underlie the behavior of matter and models that can explain and predict a wide variety of physical phenomena Matter and Interactions will be available as a single volume hardcover text and also two paperback volumes

American Journal of Physics, 1987 **Fundamentals of Physics, Part 1** David Halliday, Robert Resnick, Jearl Walker, Karen Cummings, 2000-07-14 **Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles** Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical

designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Transforming Academic Culture and Curriculum Mitchell R. Malachowski, Elizabeth L. Ambos, Kerry K. Karukstis, Jillian L. Kinzie, Jeffrey M. Osborn, 2024-02-29 Institutions across the higher education landscape vary and each navigates change in its own way This volume describes how institutions and departments influence the success of structural and cultural transformations to advance curricular reform A product of the Council on Undergraduate Research Transformations project a six year longitudinal research study funded by the United States National Science Foundation this text features the goals strategies and outcomes that evolved from the experiences at 12 diverse colleges and universities in creating innovative undergraduate curricula and campus cultures that maximize student success With the goal of achieving departmental transformations in both student learning and academic culture by backward designing and scaffolding research into and across undergraduate curricula editors include scholarly findings step by step guides and a toolkit section with plentiful online resources to help readers develop and execute personalized change processes on their own campuses Designed to span both theory and practice for departments and institutions to transform undergraduate education to increase student success this book is vital for all higher education scholars practitioners faculty staff and leaders interested in creating research rich curricula and change more broadly Visit the Council on Undergraduate Research website here <https://www.cur.org>
