Weinstein,1986 *Teacher Agency in the Process of State Mandated Reform* Kyle C. Ruggles,2009 Under No Child Left Behind NCLB federally funded schools and Local Educational Agencies LEAs that do not meet Adequate Yearly Progress A YP criteria for two consecutive years are designated Program Improvement PI mandating participation in school reform interventions In February 2008 the California Department of Education CDE released a corrective action plan mandate requiring all LEAs or school districts in Year 3 of PI to participate in intensive moderate light or other levels of technical support that includes participation in the District Assistance and Intervention Team DAIT process The DAIT process brings outside consultants and district office administrators into schools and classrooms for regular walkthroughs and assessments of improvement plan implementation Yet little is known about how these state mandates influence teachers instructional practices and decision making power or agency This study explores teachers perceptions of the DAIT process and how agency is influenced in an urban fringe pre kindergarten through grade 8 PI school district in

California that volunteered to pilot the DAIT process during the 2006-2009 school years. The socio-cultural theory of learning (Gallucci 2003) and the principal-agent theory (Ferris 1992) guide the analysis of this embedded and longitudinal multi-case study of three middle schools and the district office within the PI school district. Rich, thick qualitative descriptions from 24 teachers and five district office administrators engaged in state-mandated reform emerge from the single-case and cross-case analyses. Teachers perceive the DAIT feedback as vague and lacking in teacher involvement in classroom visitations, which led to teachers viewing the process as superficial. Yet teachers also considered the DAIT process as beneficial in increasing teacher-team reflection and collaboration around a singular common instructional focus of reading comprehension, which seemed to be positively associated with agency. A variance of teacher agency levels was found to depend upon school context and how teachers perceived themselves while balancing the costs and benefits from DAIT feedback. Findings also reveal that the DAIT process may have compromised teacher agency due to the lack of teacher participation and involvement in the development of the process, potentially eroding teachers' sense of professionalism.

NBCTs on NCLB Patrick Carl Guggino, 2008 *A Month-to-month Guide* Lainie Schuster, 2008-08-15 Provides teachers with an overall sense of planning a math curriculum and managing classroom instruction for the whole year, including what is going to be taught each month and what specifically to teach each day. Topics include problem solving, numeration and place value, geometry, measurement, multiplication, division, fractions, decimals, algebraic thinking, and more. Provided by publisher.

The Differentiated Math Classroom Miki Murray, 2007 In every mathematics classroom, the need for differentiated instruction is present in many of its acute forms. Students learn at different rates, in different ways, with different successes and different challenges. Instruction must be flexible enough to meet everyone's needs and nurturing enough to not only support growth but also address the frustration that often leads to mathphobia. *The Differentiated Math Classroom* can help make high-quality differentiated instruction a classroom reality. It is the usable, comprehensive resource teachers need to help students of all levels and abilities succeed with math. Whether you teach math sixty minutes a day or six periods a day, *The Differentiated Math Classroom* describes both the big ideas of differentiation and the day-to-day teaching that makes it work. Miki Murray and Jenny Jorgensen present everything you need to get started and to help all students meet national standards, including ideas for setting up a classroom to maximize opportunities for differentiation and establish community; getting to know students' strengths and needs through high-quality assessments; devising anchor activities that help students work independently with meaningful math content while you free up time for individual instruction; creating tiered lessons that scaffold content and provide the flexibility to challenge some students and offer assistance to others. Murray and Jorgensen offer practical ideas for planning and designing units that engage students and facilitate learning about important math concepts, as well as teaching tools, questions for professional reflection, and answers to teachers' most frequently asked questions about differentiation. Discover that differentiated instruction is a flexible framework that supports all math learners.

Filled with examples from real classes and samples of student work *The Differentiated Math Classroom* will help every child learn more effectively by showing you how to think about students mathematics and your teaching in powerful new ways
