Factor Impact Journal 2012:

Critical Essays in Sport Management Andy Gillentine, Robert Baker, Jacquelyn Cuneen, 2017-09-29 This collection of essays written by a number of respected sport management scholars addresses many of the challenges and issues facing today's sport management academic programs. It is intended to begin a professional and scholarly discussion to identify the best or at least the most logical paths to follow for sport management programs and the industry with which they are so closely aligned. Contributors invited to participate based on their recognized areas of expertise address specific topics using their own unique voices and writing styles. In the ebook version, essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays. From the Preface: The field of sport management stands at an academic crossroads; the essays in this book address the following and other emerging questions: Should our successful field of study continue to model other disciplines and perpetuate their successes as well as their shortcomings, or should we determine our own specific model for academic success? How are we doing in preparing future sport managers to perform in the industry and on the global stage? Where do we belong in the scheme of academe? The book's goal is to generate discussion among sport management professors, industry professionals who serve as adjunct faculty, and participants on sport management program advisory boards, doctoral students who intend to teach in sport management programs, and others who explore and critique higher education in general. **The Clinical Practice of Drug Information**

India Higher Education Report 2023 Pradeep Kumar Misra, Anupam Pachauri, 2025-04-22 This book traces the contours of higher education research in India. It analyses the Indian higher education system that has seen unprecedented expansion in the last couple of decades with increasing institutional and programme diversification, diverse participants accessing higher education, and curricula becoming more market-oriented in a globalised context. The book provides an empirical analysis of issues related to higher education research in the country, including international collaboration, analysis of institutions and research programs, and state and national level policies determining higher education and research trajectories. It explores the extent to which sources and supplies of funding impact research agenda, research questions, and outcomes. The book conceptually engages with the role of higher education research in providing a direction for policymakers and paving the way towards quality higher education. An important critique of higher education policy and planning, this book will be valuable for researchers and scholars in the field of education, public policy, political science, international relations, law, sociology, economics, and political economy. It will also be of interest to policy makers working in higher education and research. **Encyclopedia of Forensic and Legal Medicine**, 2015-09-29 Encyclopedia of Forensic and Legal Medicine

Volumes 1-4 Second Edition is a pioneering four volume encyclopedia compiled by an international team of forensic specialists who explore the relationship between law, medicine and science in the study of forensics. Springer Handbook of Science and Technology Indicators Wolfgang Glänzel, Henk F. Moed, Ulrich Schmoch, Mike Thelwall, 2019-10-30. This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters written by leading experts discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes such as the journal impact factor and the h index as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.
