PAT: Scenario

How does maize become maize meal? Before machines were invented to grind or crush the seeds, it took a lot of hard work to make maize meal. See the picture below.

The Makeba family lives on a farm far away from town. They grow their own maize and wheat. The family wants to make meal or flour from the maize or wheat. They want a quick and easy way to make the meal or flour that does not require a lot of hard work. You have been asked to design and make a grain crusher that will solve their problem.

A machine to crush grain will usually be powered by an electrical motor that provides rotational movement. You will not use an electrical motor in your model but will rather turn a handle of a crank by hand.

This rotational movement should be changed into a reciprocating movement so that the grain will be crushed, like hitting it with a hammer. The mechanisms that your model uses should be housed inside a strong and stable structure.
