Lighting Design A Perception Based Approach:

Lighting Design Christopher Cuttle, 2015-03-05 By reading this book you will develop the skills to perceive a space and its contents in light and be able to devise a layout of luminaires that will provide that lit appearance Written by renowned lighting expert Christopher Kit Cuttle the book explains the difference between vision and perception which is the distinction between providing lighting to make things visible and providing it to influence the appearance of everything that is visible demonstrates how lighting patterns generated by three dimensional objects interacting with directional lighting are strongly influential upon how the visual perception process enables us to recognize object attributes such as lightness colourfulness texture and gloss reveals how a designer who understands the role of these lighting patterns in the perceptual process may employ them either to reveal or to subdue or to enhance the appearance of selected object attributes by creating appropriate spatial distributions of light carefully explains calculational techniques and provides easy to use spreadsheets so that layouts of lamps and luminaires are derived that can be relied upon to achieve the required illumination distributions Practical lighting design involves devising three dimensional light fields that create luminous hierarchies related to the visual significance of each element within a scene By providing you with everything you need to develop a design concept from the understanding of how lighting influences human perceptions of surroundings through to engineering efficient and effective lighting solutions Kit Cuttle instills in his readers a new found confidence in lighting design

Theory for Theatre Studies: Light Dean Wilcox, 2024-06-27 What properties of light can be manipulated for aesthetic effect What role does the perception of the audience play in how stage information is received and processed How do changes in technology affect methods or approaches to design and practice This book is designed to introduce key ideas about light and to generate questions and perspectives that will encourage readers to explore light in the theatre more fully in their own critical and creative practices Examining the theories behind stage lighting practice to help students learn to analyse the aesthetic and critical impacts of light in performance this book traces the development of lighting practice by focusing on important shifts in technology and aesthetics from the classical period to the modern era Central to this study are ideas developed by New Stagecraft theorists and designers Adolphe Appia Edward Gordon Craig and Robert Edmond Jones Case studies include semiotic approaches to Lo e Fuller s combination of light movement and costume Robert Wilson s Einstein on the Beach and Tadashi Suzuki s The Trojan Women Further case studies including the installation work of James Turrell and Refik Anadol the Winston Salem Light Project and David Byrne s American Utopia examine the use of light in theatrical and non theatrical spaces by focusing on phenomenology community engagement and the evolution of lighting technology A companion website features links to images chapter summaries questions and further resources for study
