Preventing Home Accidents Dan Hannan,2012-01-24 Contrary to the perception that the home is a safe environment a person is ten times more likely to sustain a serious injury or die at home as a result of an accident than in the course of their employment This book will help homeowners combat those odds by providing information adapted from proven techniques used by safety professionals Filled with anecdotal descriptions and examples the book offers much more than safety tips as it educates the homeowner in how to control risk through hazard identification Information is concisely organized uniformly formatted and supported by high quality images Chapter topics include fall hazards roofs ladders stairs etc electrical safety fire prevention hand and power tool safety emergency planning and others Added value can be found in the self inspection forms or cheat sheets located at the end of each chapter that the reader can copy to complete their own home safety audit A collection of simple usable safety techniques directed specifically to homeowners like this does not currently exist The target audience is the general public with sales offered through book retail stores building material suppliers i.e Home Depot and possibly homeowner insurance companies Chapter sponsorship opportunities are being pursued through featured products i.e This chapter on ladder safety brought to you by Werner Ladders This chapter on power tool safety brought to you by DeWalt etc and supporting product imagery for these chapters would feature those manufacturers products There is a statistical gap between what we think we know and what we actually know about home safety Home safety accidents disable more than 12 million people in the home every year and are the fifth leading cause of

death Forty five percent of all unintentional deaths occur in and around the home environment claiming the lives of children aging parents spouses partners and friends making the home environment one of the most hazardous environments we inhabit But how can we expect to protect ourselves and the ones we love if we aren t even aware there is a problem Hannan says 75% of all unintentional injuries and deaths in the home hinge on our behavior more specifically on the decisions we make And the first and most important home safety decision we should make is to improve our hazard recognition skills and become more safety conscious Homeowner s can t rely on product recalls or state and federal agencies to keep them and their loved ones safe in the home Unlike other safety campaigns seen in our communities the policing and protection of our home environment depends entirely on the homeowner This book offers simple techniques to raise home safety awareness and improve our abilities to recognize hazards correct hazards and prevent unintentional accidents from occurring in the home Each chapter of has high quality images to illustrate safety procedures identifies problems and hazards in the home recommends safety practices to assist homeowners in identifying hazards gives action items for proactive prevention of accidents has a safety inspection checklist allowing homeowners to be thorough and organized in their approach to home safety and lists a reference section providing links and other resources for additional related safety information

OHS Canada ,1999 *The Home Manual. Everybody's Guide in Social, Domestic, and Business Life. A Treasury of Useful Information for the Million ...* Mrs. John A. Logan,1889

Preventing Occupational Falls Red Dot Publications,2024 The manual outlines the requirements and guidelines for fall protection during residential construction as per OSHA standards The document emphasizes the importance of providing fall protection to employees working at heights of 6 feet or more above a lower level The manual covers civilian and military setting The manual discusses the two primary methods of fall protection guardrail

systems and personal fall arrest systems Guardrail systems are physical barriers erected along the edges of elevated surfaces to prevent falls They consist of a top rail midrail and toeboard The OSHA requirements for guardrail systems include the top rail being 42 inches above the working surface the midrail being positioned midway between the top rail and the working surface the guardrail system being able to withstand a force of at least 200 pounds applied in any downward or outward direction and the guardrail system being free from any sharp or protruding objects that could cause injury Personal fall arrest systems on the other hand are designed to arrest or stop a worker s fall should they lose balance or encounter a fall hazard They typically consist of a full body harness a connecting device such as a lanyard or lifeline and an anchorage point If a worker falls the connecting device absorbs the energy of the fall and prevents them from hitting the lower level Personal fall arrest systems provide individual protection and are used when other fall protection measures such as guardrails are not feasible or do not provide adequate protection The manual also discusses safety net systems which are another option for fall protection during residential construction Safety nets are installed below the working area to catch workers in the event of a fall OSHA requires safety nets to meet certain specifications including the ability to catch a falling worker and be installed with enough clearance to prevent contact with the surface or structures below In addition to the specific requirements for fall protection during residential construction the manual highlights the importance of training resources for fall protection OSHA provides various guidelines and resources to help employers provide training to their employees The OSHA Construction Industry Outreach Training Program is a comprehensive training program that covers fall protection and other safety topics Additionally OSHA s website offers a wide range of educational materials including fact sheets videos and guides specifically addressing fall protection training Employers can also consider hiring qualified trainers or safety consultants who specialize in fall protection to provide on site training The manual emphasizes the crucial role of fall protection in ensuring the safety of workers during residential construction It outlines the specific requirements for fall protection including guardrail systems personal fall arrest systems and safety net systems and highlights the importance of proper training and resources to ensure compliance with OSHA standards Fall protection Residential construction OSHA requirements Guardrail systems Personal fall arrest systems Safety net systems Height safety Construction safety Fall prevention Accident prevention Safety regulations Compliance Risk assessment Hazard identification Safety training Equipment inspection
