

An Entrepreneurial Solution to Urban Heat Levels Project

Background Information

The United States Environmental Protection Agency (EPA) defines the heat island effect as urbanized areas experiencing higher temperatures than surrounding areas (1). These changes in microclimates are both causing and preventing a variety of health and humanitarian issues. Much of the media surrounding climate change is very negative. The type of media coverage has actually proven to be harmful to fighting climate change as it can lead to a feeling of hopelessness.

A new term being coined by psychologists and health care professionals is **climate anxiety**. The American Psychological Association defines climate anxiety as a chronic fear of environmental doom. Statistically, climate anxiety is especially common and widespread in young people. Climate anxiety and the resulting hopelessness can make it hard for climate change solutions to be found. What if we changed the narrative surrounding climate change and saw it as an opportunity instead of as our enemy?

Although our carbon-based economy has led to our current environmental crisis, it has also allowed for countless advancements in technology and industry. There is now a huge demand for innovation in the direction of climate sustainability (2). As we have seen, governments alone cannot change our current problem. The solution to our problem could be with entrepreneurs who have the unique ability to innovate new ideas and attract much needed investments into these ideas. Just look at the electric car industry. Only a few years ago, an electric car was not taken seriously and now Tesla has led to a revolution of the auto industry and is quickly becoming one of the biggest names in the industry at the moment (3). Perhaps entrepreneurs can use their talents as an opportunity to innovate new ideas and engineer new technologies leading us to a sustainable future economy.

Your Assignment: take on the role of an entrepreneur and propose an idea that helps mitigate the heat island effect.
