

FIRE PROTECTION MANUAL

PREFACE

The First Edition of this Manual was issued by the Calcutta Fire Insurance Association in 1906 and was brought up-to-date and re-issued in 1930. The third, fourth and fifth Editions were published jointly by the Insurance Associations of India and Pakistan in 1948, 1950 and 1953 respectively to provide for the needs of the whole of the areas controlled by these Associations. The subsequent sixth, seventh and eighth Editions were published by the Fire Sectional Committees of Calcutta, Bombay, Delhi and Madras Regional Councils of the Insurance Associations of India. In the ninth Edition published in 1982, amendments and additions were effected to bring the provisions in line with current thinking on fire protection techniques and to encourage installation of fixed fire extinguishing appliances/alarm systems in relatively low hazard risks on the one hand and tighten requirements for design of systems suitable for high hazard risks such as Petroleum Refineries, Petrochemical and Fertiliser Plants on the other hand, which, world-wide experience has indicated, need copious quantities of water and other extinguishing media. In this tenth Edition an effort has been made to further update and streamline the regulations.

The Manual should prove of value to factory owners and their technical personnel when dealing with matters relating to fire extinguishing appliances and also constitute a handy book of reference to Insurance officials.

The maintenance of fire extinguishing appliances in an efficient state and familiarisation with all details of operations is essential if the maximum benefit is to be derived in the emergency of an outbreak of a fire.

The Manual incorporates long experience of fire protection engineering both in India and elsewhere in the world. Compliance of the rules will not only obtain appropriate discount in the fire insurance premium but will also instil feeling of security that the presence of an efficient fire-fighting equipment should engender. Direct loss from fire and the resultant wastage is always serious but the indirect loss and the resultant dislocation of business is often much more serious.

The Regional Offices of Tariff Adv. Committee maintain an inspection staff of qualified engineers, specialists in fire protection and prevention engineering and practice in all its aspects. The services of this staff are available to make recommendations and carry out inspections in keeping
