

INSTALLATION AND CONFIGURATION GUIDE

(THIS DOCUMENT RELATES TO MDAEMON V13.0.0-ONWARDS)

Overview

This document provides an installation and configuration guide for MDAemon Messaging Server along with a brief introduction to a few of its key features.

It allows a user to download and install MDAemon and be up and running with a configured server in less than 30 minutes.

About MDAemon

MDaemon is a powerful Windows based email and groupware server designed to fulfil all the email requirements of organisations ranging from just a few users right up to ones with many hundreds of users. MDAemon is a reliable and easy to configure solution that, while being very reasonably priced, still offers more features than virtually every other email server on the market.

MDaemon can be installed on-premise or on a virtual machine hosted within Cloud infrastructure such as Amazon AWS or Microsoft Azure. MDAemon is ideally suited to receiving email via direct SMTP delivery, however, it also offers support for situations where a statically assigned IP address may not be available – in which case DomainPOP and/or MultiPOP email collection may typically be used.

Add-on functionality (requires separate licences)

Additional services can be enabled within MDAemon to provide advanced spam and virus filtering, comprehensive Outlook integration and full ActiveSync support for the latest smartphones.

SecurityPlus for MDAemon

SecurityPlus for MDAemon incorporates the latest virus scanning technology from Kaspersky Labs and combines it with a sophisticated feature called Outbreak Protection which is based on real-time pattern matching technology from industry leader Cyren (www.cyren.com). Outbreak Protection successfully rejects the vast majority of spam, viruses and phishing attacks that spread rapidly across the Internet before handing the remaining messages through to the Kaspersky AV engine and then MDAemon's powerful spam filter for further filtering before they pass through to end users. The SecurityPlus plug-in is a vital addition to any MDAemon server and is **HIGHLY RECOMMENDED**.

Important note: The use of other third-party anti-virus applications on your MDAemon server can cause problems such as server crashes, lost or duplicated emails, locked mail queues and unreliable detection of infected messages. If you are running another anti-virus application on your MDAemon server, you must ensure that you exclude all of MDAemon's folders from real-time scanning and that the email traffic to and from MDAemon's services is not being intercepted for scanning. Alt-N's AntiVirus plug-in for MDAemon is designed specifically to operate with MDAemon at the right point in the message delivery process and so provides the only reliable AV solution for use with your MDAemon server.
