

### Research Paper Proposal

For JURI495 and 496, the research issue that you select must encompass at least two disciplines, law and a liberal arts discipline such as history, philosophy or political science. Your proposed area of research must require the contribution of more than one disciplinary perspective in order to gain adequate understanding and arrive at conclusions that integrate the various disciplinary perspectives. SEE RESEARCH HYPOTHESIS EXPLANATION.

Write your Research Paper Proposal in the following format:

- ✓ Paragraph of introduction to your topic.
- ✓ Research Hypothesis—expressed three ways :
  - As a one-sentence hypothesis
  - As a research question
  - As a title for your paper
- ✓ Essential Disciplines and Sub-Disciplines
- ✓ Definition/Explanation of any essential terms [legal terms or disciplinary jargon of the field you are researching] with footnoting of the sources of your definitions
- ✓ Description of how you will conduct your interdisciplinary research; the design of your research [may be up to 2 paragraphs]. Note: **In this section, you must include a sentence which begins “An interdisciplinary approach is essential [or required] to [fill in.....] because no single disciplinary perspective can adequately address this question/issue.** This section is the “road map” in two prose paragraphs describing your research. It paints a picture of the proposed path of your research **OVER THE TWO-SEMESTERS OF THE COURSE.**
- ✓ Predicted research conclusions. These conclusions must be responsive to your research hypothesis.

**Maximum total length is approximately one to two pages, depending upon whether you need to define terms and, if so, how many.**

Here are some common errors in Research Paper Proposals:

- no attribution of sources for definitions or no definitions for discipline-specific terms.
- inadequate research plan: the plan is a prose roadmap of where you want to go with the paper. It will be useful for your outline, but it is much more general.
- no mention either in the introduction or the research plan of the need for interdisciplinarity [i.e. necessity for 2 or more disciplines] to fully study the topic
- expected conclusions: just as, in a case brief, the rule of law is the answer to the issue, in your papers, the conclusions must answer the hypothesis. Do not introduce into the conclusion any element which does not follow from your lines of inquiry for the hypothesis.

# Example Of Research Project Paper

**Christopher Gandrud**

## **Example Of Research Project Paper:**

Doing a Research Project in Nursing and Midwifery Carroll Siu, Huguette Comerasamy, 2013-02-01 Due to ethical issues surrounding data collection in the field of healthcare students are no longer able to undertake their own empirical research This book is written for nursing and midwifery students completing a research project based on reviewing published literature and using secondary data It demystifies the concept of literature review methodology and supports students writing up their dissertation thesis or work based learning project The book provides step by step guidance on Identifying a research problem Qualitative and quantitative research design Literature searching Ethical considerations Analysis of secondary data Writing your dissertation Through its discussion of non empirical methods the book also prepares students for future empirical research by providing examples of best practice in healthcare research The book is essential reading for undergraduates and postgraduates who want to succeed in their nursing or midwifery research project 100 Activities for Teaching Research Methods Catherine Dawson, 2016-08-08 A sourcebook of exercises games scenarios and role plays this practical user friendly guide provides a complete and valuable resource for research methods tutors teachers and lecturers Developed to complement and enhance existing course materials the 100 ready to use activities encourage innovative and engaging classroom practice in seven areas finding and using sources of information planning a research project conducting research using and analyzing data disseminating results acting ethically developing deeper research skills Each of the activities is divided into a section on tutor notes and student handouts Tutor notes contain clear guidance about the purpose level and type of activity along with a range of discussion notes that signpost key issues and research insights Important terms related activities and further reading suggestions are also included Not only does the A4 format make the student handouts easy to photocopy they are also available to download and print directly from the book's companion website for easy distribution in class **Research Projects for Business & Management Students** Siah Hwee Ang, 2021-01-27 This second edition of Research Projects for Business and Management Students provides students undertaking extended research with a foundation upon which to build their practice The author sets out each stage of a research project systematically to allow you to follow along and build an understanding of the processes involved in carrying out in depth pieces of research as well as the functions of commonly used research methods Conversation boxes throughout will also help situate your learning by providing examples of commonly asked questions challenges that may occur while you carry out your research and guidance on how to answer them Professor Siah Hwee Ang is Professor of International Business and Strategy inaugural Chair in Business in Asia and Director of the NZ's Southeast Asia Centre of Asia Pacific Excellence at Victoria University of Wellington New Zealand *Reproducible Research with R and RStudio* Christopher Gandrud, 2020-02-21 Praise for previous editions Gandrud has written a great outline of how a fully reproducible research project should look from start to finish with brief explanations of each tool that he uses along the way Advanced undergraduate students in

mathematics statistics and similar fields as well as students just beginning their graduate studies would benefit the most from reading this book Many more experienced R users or second year graduate students might find themselves thinking I wish I d read this book at the start of my studies when I was first learning R This book could be used as the main text for a class on reproducible research The American Statistician Reproducible Research with R and R Studio Third Edition brings together the skills and tools needed for doing and presenting computational research Using straightforward examples the book takes you through an entire reproducible research workflow This practical workflow enables you to gather and analyze data as well as dynamically present results in print and on the web Supplementary materials and example are available on the author s website New to the Third Edition Updated package recommendations examples URLs and removed technologies no longer in regular use More advanced R Markdown and less LaTeX in discussions of markup languages and examples Stronger focus on reproducible working directory tools Updated discussion of cloud storage services and persistent reproducible material citation Added discussion of Jupyter notebooks and reproducible practices in industry Examples of data manipulation with Tidyverse tibbles in addition to standard data frames and pivot\_longer and pivot\_wider functions for pivoting data Features Incorporates the most important advances that have been developed since the editions were published Describes a complete reproducible research workflow from data gathering to the presentation of results Shows how to automatically generate tables and figures using R Includes instructions on formatting a presentation document via markup languages Discusses cloud storage and versioning services particularly Github Explains how to use Unix like shell programs for working with large research projects

**Designing and Managing a Research Project** Michael Jay Polonsky, David S. Waller, 2018-10-03 Designing and Managing a Research Project A Business Student s Guide is a practical step by step guide that shows business students how to successfully conduct a research project from choosing the topic to presenting the results The authors have applied their many years of experience in supervising student projects to provide examples of actual research problems and to offer practical solutions The inclusion of topics such as supervision group work and ethics and both qualitative and quantitative data analysis along with examples from real student research provide a unique perspective The new Fourth Edition includes broader types of student project examples such as an Economics thesis additional international business cases increased coverage of Questionnaire Design and Institutional Review Boards and an integrated case throughout the book on High Performance Shoes with supporting materials and data Additional resources including case studies PowerPoint slides and test bank are available on the authors website *Nigeria, National Agricultural Research Project Preparation Report: Working papers*, 1989 *Annual Meeting Papers* American Petroleum Institute.
