**Assessment in Geographical Education: An International Perspective** Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading

researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills Normal Instructor and Teachers World ,1924 **Popular Educator** ,1925 **Library Media Connection** ,1990 Crowdsourcing, Constructing and Collaborating Siddharth Peter de Souza,Nida Rehman,Saba Sharma,2021-12-30 Citizens around the world use crowdsourced platforms to hold governments accountable to fill gaps in infrastructural and municipal services and to call attention to issues that impact everyday lives such as sexual violence and environmental injustice Crowdsourcing Constructing and Collaborating brings together individuals and groups engaged in building and sustaining platforms for online collaboration and participation to explore and reflect on the methods challenges and potentials of the technology of crowdsourcing and mapping of social impact It brings together people directly involved in a range of projects from around the world I Paid A Bribe Environmental Justice Atlas HarassMap Intolerance Tracker Visualizing Palestine and Humanitarian Tracker to critically reflect on the tactics methods challenges and opportunities of crowdsourcing and crowd mapping as tools for social environmental and political change In an accessible and visually engaging style it shows how participatory digital media become crucial components of journalistic scholarly and activist practices addressing a range of topical challenges including economic corruption sexual harassment political violence and environmental conflict in diverse geographic contexts **Army History** ,2018 *The Governance of Artificial Intelligence in the "Autonomous City"* Federico Cugurullo,Tan Yigitcanlar,Xiaoling Zhang,Vincent J. Del Casino Jr.,Natalie Marie Gulsrud,Sarah Barns,2023-10-18 Artificial intelligence AI is now mediating and in some cases seen to be controlling key urban services and infrastructures thus becoming a prominent feature of the contemporary city As portrayed in recent studies the autonomous city can be understood as a city where urban artificial intelligences perform tasks and take on roles which have traditionally been the domain of humans At stake in these debates are questions related to the meaning and ongoing role of intelligence for both humans and machines While autonomous cars transport people service robots run shops drones deliver goods and city brains govern entire cities humans are redefining the meaning of what smart means in the city and what role the human being may play in future urban spaces With humans shifted to new sectors of the economy or pushed aside by algorithms and robotic agents creating new ways of seeing and governing the city we raise the question as to whether or not cities are becoming more autonomous from human experience in the sense that their operation does not rely as much on human inputs anymore *Interdisciplinary Approaches to Multilingualism* Suzanne Curtin, Mary Grantham O'Brien,Rahat Naqvi,2015-07-16 This research topic stems from the Interdisciplinary Approaches to Multilingualism conference which was hosted by the Language Research Centre at the University of Calgary It was the first conference of its kind which brought together the work of

researchers educators and policy makers in the areas of first and second language acquisition from psycholinguistic and pedagogical perspectives The goal was to provide an opportunity for participants to engage with the implications of multilingualism from a range of perspectives including the effects of being bilingual from infancy to adulthood the process and benefits of learning multiple languages and the impact of multilingualism on society

**Resisting Domination in Palestine** Alaa Tartir, Timothy Seidel, Tariq Dana, 2024-04-04 This meticulously curated edited volume presents an assemblage of insightful critical and contemporary perspectives on how Israeli domination has been sustained and reproduced in new forms and means using various mechanisms and techniques of control coloniality and settler colonialism Based on original empirical fieldwork the contributors to this book adopt interdisciplinary and decolonial approaches in their examination of the intricate functions and structures of domination that permeate Palestinian life by illuminating the power dynamics at play and revealing the mechanisms that sustain the settler colonial regime This book identifies sites of colonial control and domination exerted on Palestine by Israel and demonstrates how these sites of control are also sites of Palestinian resistance The first section explores the political sites of control by focusing on governmentality institutions and technologies and mechanisms of control including how Israel manages access to health life and death The second section examines the economic mechanisms of exploitation dispossession and de development including banking taxation and the relationships between finance capital aid and military occupation The third section turns attention to environmental sites of control focusing on land indigeneity space and racial capitalism Finally section four scrutinizes the intellectual sites of control highlighting how norms narratives and knowledge production perpetuate domination
