

### DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility design standards are limited to only the oldest people living and exclude many who might otherwise use them.

**IN AN AGE OF GROWING POPULATION** that has grown significantly and quickly since the 1950s, it is essential to design transportation systems that are accessible to all. This includes people of all ages and abilities. The National Association of City Transportation Officials (NACTO) is committed to creating a more inclusive and equitable transportation system for all.

# Urban Bikeway Design Guide

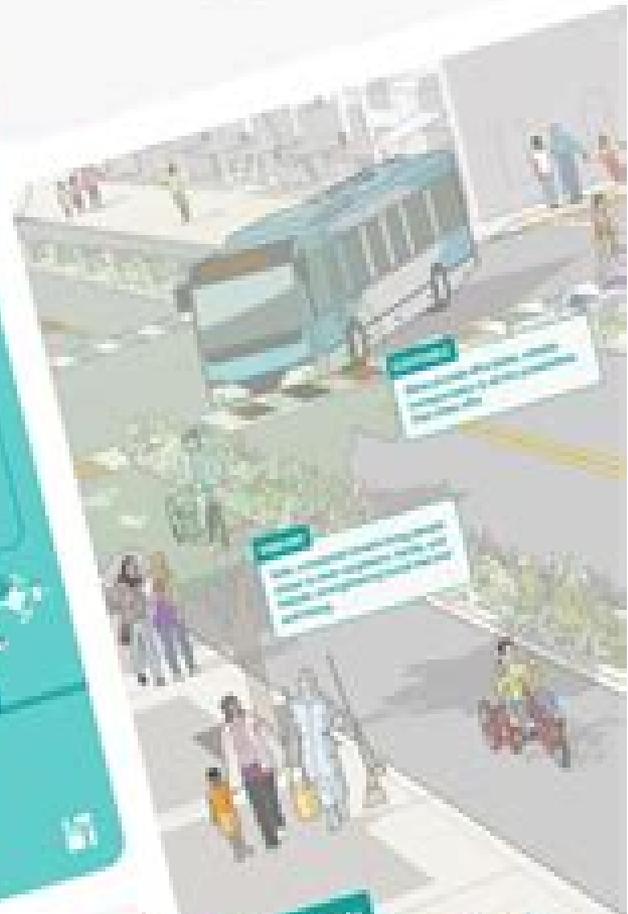

National Association of City Transportation Officials

Third Edition

The third edition of the Urban Bikeway Design Guide provides updated guidance on how to design bike facilities that are safe, usable, and accessible to all. It includes a new chapter on how to make the most of limited space.

### OUR VISION

Cities where safe, sustainable, and equitable transportation systems connect communities to the resources they need to thrive
