QUICK GUIDE - CODING CHEAT SHEET

Important Notes:

- The "initial" service is the first administration and primary infusion for the intravenous, parenteral, diagnostic or chemotherapy service provided for the patient and is reported separately from all other units of that service without the service code.
- If an infusion or injection is a subsequent or concurrent infusion, even if it is the first such service within that group of services, then a subsequent or concurrent code from the appropriate section should be reported.
- The time of the service should be billed only upon the administration time for the infusion, service beginning to and concluding the infusion have been included in the infusion service code, and not separately reported. This includes stopping the IV and monitoring the patient post infusion.
