**It Security Products for Corporate Users** Peter Stelzhammer, Andreas Clementi, Thomas Arlt, Philippe Rödlach, 2010  
Most organizations are aware of the risks threatening their IT environment. Viruses, trojans, worms, exploits, and many other threats represent a serious danger for the IT department. A collapse of the IT system could mean grave financial losses, right up to insolvency for a company. The IT departments of companies are conscious of this problem. Getting the best protection against these threats is the only issue. A simple file antivirus solution alone is totally inadequate as there are too many threats from contaminated e-mails, exploits, etc. What is required is a comprehensive suite that provides protection against all of these. Functional Diversity: Because of the immense functional diversity of various antivirus suites and corporate products, it is becoming increasingly difficult for decision makers in the IT sector to get a proper overview. Which product should one opt for and for which areas of protection? During these tests, our main focus has not been on malware detection rates but on the products' handling and user-friendliness and the scope of functionality. We have compiled the functional scope of various products in a detailed table. For malware detection rates of individual products, please refer to the tests of our website: <http://www.av-comparatives.org>

**Federated Content Management: Accessing Content from Disparate Repositories with IBM Content Federation Services and IBM Content Integrator** Wei-Dong Zhu, Roger Bacalzo, Eric Edeen, Yong Jun, Daniel Ouimet, Jason D Schmitt, Bingrong Wang, Daniela Wersin, D Blake Werts, Martin Willingham, IBM Redbooks, 2010-04-21  
Today, businesses have valuable operations data spread across multiple content management systems. To help discover, manage, and deliver this content, IBM provides IBM Content Federation Services and IBM Content Integrator. This IBM Redbooks publication introduces the concept of federated content management and describes the installation, configuration, and implementation of these product offerings. IBM Content Federation Services, available through IBM FileNet Content Manager, is a suite of three federated content management services based on the federation implementation strategy. We describe how to install and configure Content Federation Services for Image Services, Content Manager OnDemand, and IBM Content Integrator. Using an integration implementation strategy, IBM Content Integrator provides a repository-neutral API that allows bidirectional, real-time access to a multitude of disparate content management system installations. We present connector configuration details for frequently encountered content management systems. We provide detailed instructions and sample implementations using the products' Java™ and Web Services APIs to access content stored in repository systems. This book is intended for IT architects and specialists interested in understanding federated content management and is a hands-on technical guide for IT specialists to configure and implement federated content management solutions.
