Now it is well-known in all branches of learning, but in particular in *mathematical* learning, that the way to learn is to *do*, rather than to *read*. It is all too common to read through some material, convince oneself that one understands it well, but then find oneself at sea when trying to apply it in even a slightly different situation. Moreover, material understood only at a shallow level is easily forgotten.

It is therefore our *strong* recommendation that readers of the book should not look at our responses to any of the exercises before making a substantial effort to understand it without this aid. Any time spent in this way, even if it ends without success, will make our solutions
