# QUICK GUIDE - CODING CHEAT SHEET

**Infusion Services**

- The "total" service is the total replacement and primary infusion for the intravenous, parenteral, or diagnostic service provided for the patient and is reported once for all the units of fluid that the service covers
- If an infusion or injection is a subsequent or concurrent infusion, even if it is the first such service within that group of services, then a subsequent or concurrent code from the appropriate section should be reported
- The time of the service should be billed only upon the administration time for the infusion, service beginning to and concluding the infusion have been included in the infusion service code, and not separately reported. This includes starting the IV and monitoring the patient post infusion.
